Kernel methods for vessel trajectories

deu Vries, G.K.D.

Citation for published version (APA):
CONTENTS

PREFACE ix

1 INTRODUCTION 1
   1.1 Approach 1
   1.2 Research Questions 2
   1.3 Poseidon Project 4
   1.4 Outline 4

2 PRELIMINARIES 7
   2.1 Machine Learning 7
      2.1.1 Kernel Methods 9
      2.1.2 Evaluation Metrics 14
   2.2 Spatio-Temporal Data-Mining 15
      2.2.1 Moving Object Trajectories 15
      2.2.2 Trajectory Similarity Measures 16
      2.2.3 Data-Mining Tasks for Trajectories 17
      2.2.4 Temporal Data-Mining and Kernel Methods 18
   2.3 Maritime Safety and Security Systems 19
      2.3.1 Vessel Trajectories from AIS 20
      2.3.2 Clustering 21
      2.3.3 Classification 21
      2.3.4 Outlier Detection 23

3 TRAJECTORY COMPRESSION 25
   3.1 Introduction 25
   3.2 Trajectory Compression 26
      3.2.1 Trajectory Definitions 26
      3.2.2 Piecewise Linear Segmentation 27
      3.2.3 A Problematic Example 30
      3.2.4 Two Stage Piecewise Linear Segmentation 31
      3.2.5 Error bounds and Complexity 32
   3.3 Evaluation 33
      3.3.1 Stop Retention 33
      3.3.2 Experimental Set-Up 34
      3.3.3 Results 35
      3.3.4 Discussion 38
   3.4 Deriving Complex Behavior 39
      3.4.1 Semantic Web 39
      3.4.2 Simple Event Model 40
      3.4.3 Segments 40
      3.4.4 Additional Semantics 41
   3.5 Conclusions & Future Work 43
4 Alignment Based Similarities 45
  4.1 Introduction 45
  4.2 Trajectory Alignment Kernels 46
    4.2.1 Alignments 47
    4.2.2 Alignment Kernels 49
  4.3 Experiments 51
    4.3.1 Experimental Setup 52
    4.3.2 Clustering 54
    4.3.3 Classification 58
    4.3.4 Outlier Detection 62
  4.4 Conclusions & Future Work 63

5 Integral Based Similarities 67
  5.1 Introduction 67
  5.2 Integral Based Trajectory Similarity 68
    5.2.1 Full Trajectory Similarity Kernels 70
    5.2.2 Subtrajectory Similarity Kernels 76
  5.3 Experiments 78
    5.3.1 Experimental Set-Up 78
    5.3.2 Clustering 79
    5.3.3 Classification 80
    5.3.4 Outlier Detection 82
  5.4 Conclusions & Future Work 84

6 Adding Domain Knowledge 87
  6.1 Introduction 87
  6.2 Geographical Domain Knowledge 88
    6.2.1 Domain Ontologies 88
    6.2.2 Enriching Trajectories 91
  6.3 Enriched Trajectory Kernels 92
    6.3.1 Substitution Functions for Sets of Geo-Labels 93
    6.3.2 Kernels 94
  6.4 Experiments 96
    6.4.1 Experimental Set-Up 97
    6.4.2 Clustering 97
    6.4.3 Classification 100
    6.4.4 Outlier Detection 105
  6.5 Conclusions & Future Work 108

7 Conclusion 109
  7.1 Answers to Research Questions 109
  7.2 Discussion 111
  7.3 Future Work 112

A Stop Retention Full Results 115

B Edit Distance Soft-Max Kernel Proof 121
