Acknowledgments

I would like to thank Michael Spranger, Martin Loetzsch, Joe Hilferty and Nancy Chang with whom I have collaborated intensively throughout the past few years. Without them I would not have gotten far and it certainly would not have been as much fun. I would also like to thank both my supervisors Frank Veltman and Luc Steels for their support and feedback, and providing the framework and financial means to conduct this research. Furthermore I would like to thank Remko Scha, Remi van Trijp, Lucas Beerekamp, Ranne Hovius, Daniel Oberski, and Frans Mettes (who also designed the cover of this thesis) for providing feedback and corrections; my paranymphs Rogier Heumakers and Emma Pauw; and Joris, Pieter, Joachim, Katrien, Vanessa, Katya, and Oscar, my collaborators from the Vrije Universiteit Brussel, Sony CSL Paris, and the Universitat Autònoma de Barcelona.
