Fighting over forest: interactive governance of conflicts over forest and tree resources in Ghana’s high forest zone

Derkyi, M.A.A.

Citation for published version (APA):
List of tables

1.1 Research questions addressed in the various chapters 5
2.1 Overview of the conflict categories and intensities 17
2.2 Conflict management strategies 19
2.3 A governability assessment framework 28
3.1 Study communities selected in accordance with the management regimes 37
3.2 Estimated adult population, number of respondents in the semi-structured survey and participants in community validation meetings in the study villages in study of MTS 44
3.3 Estimated adult population, number of respondents in the semi-structured survey and participants in community validation meetings in the study villages in the production area 45
4.1 Ecological zones in Ghana’s high forest zone and their characteristics 53
4.2 Globally Significant Biodiversity areas in Ghana’s high forest zone 56
4.3 Actor analysis by community representatives relating to non-timber forest product (NTFP) use for domestic and commercial purposes 67
4.4 Government institutions representatives’ images of stakeholders in the forest sector 68
5.1 Timeline of Ghana’s colonial and post-colonial forest policies and legislations (1908-2011) 75-76
5.2 Timeline of major events in the global forest policy dialogue 92
6.1 Forest and tree-based livelihood components and key beneficiaries within forest context in Ghana 112-113
6.2 Contexts and types of forest and tree-related conflicts and main actors involved 115
6.3 SWOT matrix of re-introduction of forest prosecution system in the forest sector and curriculum of natural resource academic institutions 125
6.4 Confrontation matrix 126
7.1 Socio-economic characteristics of respondents (n=119) 136
7.2 Actor analysis by community representatives relating to admitted farming in the forest reserve 141
7.3 Actor analysis by community representatives related to illegal farming in the forest reserve 141
7.4 Livelihood components around which conflicts evolve 147
7.5 Antecedents and manifest behaviour leading to forest livelihoods conflicts in Tano-Offin GSBA 149
7.6 Respondents’ opinions about conflict severity 150
8.1 MTS beneficiary communities and planted areas under the Tano-Offin plantation regime (2002-2007) 161
8.2 Socio-economic characteristics of the respondents 165
8.3 Respondents’ perceptions of conflict issues related to institutional/operational arrangements 172
8.4 Respondents opinions about conflicts severity 174
9.1 Socio-economic characteristics of respondents 191
9.2 Current benefit-sharing schemes for royalties from timber resources in on and off-reserve areas 195
9.3 Livelihood components around which conflicts evolve 197
9.4 Multiple antecedent conditions and manifest behaviour of resource-based conflict types in production forest 200
9.5 Multiple antecedent conditions and manifest behaviour of operational conflicts within TUC area 202
10.1 Stakeholder groupings who participated in the TBI workshop in 2007 212
10.2 Total off-reserve within the high forest zone of Ghana according to vegetation zones 213
10.3 Species available on farmers’ fallow and farmlands 226
10.4 Crop and tree combinations on farm and fallow lands 227
10.5 Compensation paid for harvesting trees from farm and fallow land 227
11.1 The forest reserves, total area, perimeter and stool land owners in Nkawie Forest District 237
11.2 Trend in the number of recorded offences in Nkawie Forest District 246
11.3 Types of tree species sawn into lumber (2005-2010) 247
11.4 Tree species exploited under illegal logging (2005-2010) 248
11.5 Illegal farming offence outcomes from 2005-2010 250
11.6 Evaluation of judiciary enforcement of forest and tree-related offences on some selected unreported judgement in the courts under the jurisdiction of the Nkawie Forest District 254

List of figures

1.1 The study sites 3
2.1 The conflict process 14
2.2 The conflict wheel as an analytical tool 18
2.3 Components of the interactive governance model and their linkages to governability 23
2.4 The governing structure framework for Ghana’s forest sector 27
2.5 Conceptual framework to understand forest and tree resource conflicts and conflict management strategies from an interactive governance perspective 30
3.1 The research design process for a case study approach in applied research 35
3.2 Study coverage 38
4.1 Ghana’s high forest zone 50
4.2 Protected wildlife areas in Ghana 51
4.3 Ghana’s vegetation zones 54
4.4 Schematic representation of the nested nature of the natural system-to-be-governed and the interactions between the components 62
4.5 The Tano-Offin forest reserve indicating most of the forest fringe communities 65
5.1 The governing structures in forest governance process in Ghana forestry sector 80
5.2 Ministry of Lands and Natural Resources and Forestry Commission 81
5.3 Principles underlying interactive forest governance in Ghana 94
6.1 Integrated conflict management system (ICM) model designed by forest governors and experts during the dissemination and consensus workshop on ‘Forest and tree governance arrangements and forest and tree conflict management in Ghana’s high forest zone’ held in Kumasi, Ghana, on 12 February, 2010 123
6.2 Flow chart of compensation and land use-related conflict management pathways 123
7.1 Map of Kyekyewere village within the Tano-Offin GSBA 131
7.2a Status of Tano-Offin and admitted village before GSBA demarcation 135
7.2b Status of Tano-Offin and admitted village after GSBA creation, indicating the perceived contested pieces of land 135
7.3 Geographical origin of the inhabitants of Kyekyewere according regions 137
7.4 Use of the forest reserve by inhabitants of Kyekyewere 138
7.5 Multi-level analysis of actors involved in livelihood conflicts in Tano-Offin GSBA (Kyekyewere village), Ghana 148
7.6 Proportion of respondents indicating which conflict management strategies prevailed for each conflict type 152
8.1 Map of Tano-Offin Forest Reserve showing the study communities 162
8.2 Trend in the area planted under the MTS by farmers in Chirayaso and Kunsu-Nyamebekyere No. 3 from 2002-2007 163
8.3 The partnership arrangement within the modified taungya system (MTS) in Ghana, indicating the heterogeneity of actors involved 171
8.4 Conflict categories displaying the issues and actors 173
8.5 Conflict management strategies employed in the institutional and operational conflict category 177
8.6 Conflict management strategies employed in the competing claims category 178
8.7 Outline of a scenario planning process 185
9.1 Map of the Tano-Offin forest reserve indicating the two study communities 189
9.2 Use of the forest reserve by inhabitants of Chirayaso and Kunsu-Nyamebekyere No. 3 192
9.3 The vicious cycle of forest and tree livelihood conflicts in the production forest regime 199
9.4 Proportion of respondents who indicated which conflict management strategies prevail for each conflict type 201
9.5 Perceived spectrum of conflict management strategies employed in SRA, log theft and crop damage compensation conflicts in TUC areas (on and off reserve) 203
10.1 Map of Awisasu community bordering Tano-Offin Forest Reserve 214
10.2 Timeline of changes in legislations recognition of farmers/local communities’ benefits in timber resources 216
10.3 Actors and their roles in, and benefits from, off-reserve timber resource management 217
11.1 Forest reserves in Nkawie Forest District 238
11.2 The institutions within the statutory governing structure involved in law enforcement 239
11.3 The hierarchical structure of the judicial system in Ghana 242
11.4 Distribution of forest offence types in Nkawie Forest District (2005-2010) 245
11.5 Trend in the number of recorded forest offences in Nkawie Forest District 246
11.6 Distribution of chainsaw milling offences in the on and off-reserve areas in Nkawie Forest District (2005-2010) 247
11.7 Recorded occurrence of illegal timber logging in Nkawie Forest District (2005-2010) 248

List of boxes

2.1 Distinction between governance and management 21
2.2 Assumptions underlying interactive governance theory 23
2.3 System characteristics of interactive governance 24
4.1 Background information on GSBAs in Ghana 55
4.2 Special features of the modified taungya system 61
4.3 Perceptions of representatives of communities within and bordering the Tano-Offin Forest reserve 64
5.1 Reasons underlying forest reservation conflicts 78
5.2 Actions and inactions of forest actors that hamper the governing system as perceived by forest governors and experts 86-87
5.3 Several collaboration initiatives between local communities and other stakeholders 88
5.4 The myriad of ongoing forest governance initiatives  89
5.5 On and off-reserve rights to ownership, use, revenues and benefit sharing  95-96
5.6 The Forest and Wildlife policy of 1994 is a move in the right direction but  96
5.7 Customary laws and practices within the 1992 Constitution of Ghana  98
5.1 Forest governors and experts’ opinions of sources of offence and conflicts related to
forest and tree livelihoods in Ghana’s high forest zone  117
5.2 Action Plan 1 - Effective strategies to achieve an integrated conflict management (ICM)
model that reconciles statutory and customary mechanisms  122
5.3 Action Plan 2 - Assessment of the feasibility of re-introducing the forest prosecution
system into the forest sector with a prosecuting mandate for the FC and of adapting the
curriculum of natural resource academic institutions accordingly  122
7.1 The positions of sub-chiefs  142
7.2 Forest Protection Decree 1974 NRCD 243 as amended by the Protection Amendment Act
2002, Act 624  144
8.1 Local peoples’ views on the contributions of the MTS to their livelihoods  167
8.2 Conflict scenario and conflict management processes in the Chirayaso community  175
8.3 Rolling-out strategy of the modified taungya system scheme (mostly for exotic species
such as teak)  180
8.4 Uncertainties in the MTS that need to be addressed in scenario planning  185
9.1 Recommended roles for local level institutions  206
10.1 The different ‘abusa’ relations in Ghana farming system  220
10.2 Images, instruments and actions multi-stakeholder perspectives of off-reserve
management in Ghana’s high forest zone  222
10.3 From images to action: the views of off-reserve timber operators  223
10.4 Strategies used by the timber contractor and the local people to achieve a good
relationship during tree felling in the off-reserve area  224
10.5 Why farmers destroy naturally grown timber trees on farmlands  225
10.6 The Investment Method of Valuation  230
11.1 Reported and unreported cases in Ghana’s judicial system  237
11.2 The Timber Resources Management Act, 1997(Act 547), Section 17 stipulates
that:  242
11.3 Timber Resources Management Regulation, 1998, (L.I. 1649) Regulation (41) deals with
the offences and declares that  243
11.4 Criminal Offences (sections) as stipulated in Article 19 of the 1992 Constitution of
Ghana  244
11.5 Perceived factors that result in downgrading forest offences  256
12.1 Key research questions  263

List of photos

7.1 Kyekyewere village located within the Tano-Offin reserve  133
7.2 A man carrying a bundle of canes  139
7.3 A woman and child with head loads of wrapping leaves  139
8.1 Food crops from MTS farms provide local communities with cash and non-cash
income  166
8.2 Madame Beatrice, a proud owner of this house that she could afford thanks to her
participation in the MTS in Chirayaso from 2004-2010  166
8.3 Timber trees established in the MTS represent future income for the farmers who are
entitled to 40% of the revenue  166
