In this final section of my thesis, I would like to thank all those who contributed, directly or indirectly to the book you, reader, are holding in your hands. Doing a PhD is not only about chemistry, it’s also a human adventure. During these four years, I had the chance to meet people who taught me about chemistry and life, who cheered me up when the results were not as good as expected and with whom I had good times. Without them, I doubt I could have obtained the title of doctor, and my stay in Amsterdam wouldn’t have been such a nice experience. I miss words to express all my gratitude!

First of all, I would like to thank my supervisor who was kind enough to accept me in his group. Joost, I really enjoy your creativity and your enthusiasm about chemistry. It’s always a pleasure to discuss with you about various subjects. Thank you for helping me to define the “scientific questions” and to make something coherent with my data.

I am very grateful to Bas, who gave me regular advice and comments and who told me everything I know about DFT.

Jarl, thank you very much for your input in this work! Your support was crucial. I really enjoyed our scientific and non-scientific discussions. Thank you for being available and patient, for your pertinent suggestions and your accurate remarks.

I am also grateful to Antoni Riera, Liz Bouwman, Jan van Maarseveen and Frédéric Patureau for accepting to be in my committee.

I would like to thank Sander O, my METAMORPhos co-worker, for his help with many aspects of this thesis. We suffered together and we shared moments of excitement together. I wish you a lot of success and many papers for the end of your PhD!

Monalisa and Rafa, thank you very much for accepting to be my paranymphs. Rafa, on se connait depuis déjà douze ans! Merci pour ton aide sur le plan scientifique et pour les bons moments passés en dehors du labo. Enjoy your Japanese adventure! Monalisa, it was a pleasure to share a lab and a flat with you. I still need to learn a lot from you about Indian cuisine…

Now I would like to thank my former roomie, Paweł. I miss you a lot! I miss nice dinners (Paweł is a great cook!), parties, discussions... On a scientific point of view, I learnt a lot from you. I hope we can see each other very soon!

The InCatT members are also big contributors to this thesis. Sander, Remko, thanks you for sharing your knowledge about METAMORPhos and for helping me elucidating the weird behaviour of this ligand. Thank you Sander for your optimism, at some point, I really needed it! Zohar, thank you for your help with the robot and for the nice discussions about life in general.

Wojciech, thank you very much for your help on the manuscript and for the nice scientific discussions we had. I hope we can play board games very soon!

Rosalba, thank you for being here when I needed a roof! You are a great friend, even if you kill innocent plants. I would like to thank you and Henri for hosting us in Lyon.
Alma, Ivo, my ex-roomies of Plantage (and Leiden): we shared so many good times, I am feeling nostalgic now! Cheeses be with you!

Zof et Yann, merci pour les bons moments passés ensemble, les diners et les fêtes, les arrachages de papier peint et les séances de ciné. Quelle que soit l’activité, je l’apprécie quand c’est avec vous!

Yasemin, we started almost in the same time and we shared the same lab for so many years! Thank you for the nice time we had outside of the lab too. Good luck for the end of the PhD!

Julien, merci d’avoir été là, en particulier dans les moments où j’avais besoin de décompresser! Les soirées vin rouge étaient bien sympas, même si les mals de crâne du lendemain étaient pas toujours plaisant…

Thank you Leszek for you advice in the lab and for all the nice moments we spent in Amsterdam and Brussels, with and without the lovely Felicietta.

Pierre, le dernier membre de la METAMORPhos team, un grand garçon plein de surprises! Merci pour ton aide et pour ton travail sur les NPP-PNP. Bon courage pour la fin de la thèse.

Tatiii! Tellement de bons moments passés ensemble! Je suis impatient d’aller te rendre visite!

Thank you Annemarie for being so nice and helpful.

I would like to thank Jurjen, a great friend, landlord and sailing teacher!

I am also grateful to all the people who have been working in the lab, for their help with chemistry and for the nice atmosphere they contributed to: Danny (also a great party organizer), Stefan (I am convinced that one day, we’ll go to a concert of Electric Six together), Tendai (an awesome girl that I miss a lot), Erika, Piluka, Samir (your good-bye borrel was the most amazing ever), Jelmer, Rick (my container neighbour), Jana (my other container neighbour, the trip to Berlin was great!), Dennis, Sandra, Christophe, Pauline (merci de m’avoir aidé à coacher Paweł sur le plan culinaire!), Avi (I miss your broad knowledge), Vincent (what a backstabber!), Bart (good luck with the end of your PhD!!), Fenna, Nicole, René (can be very spontaneous a parties ;-), Michel, Matthias, Arnaud, Martin, Ester, Linda, Jeroen, Vladi, Markus, Ronald, Christophe R., Marten, Angela, Massimo, Dirk, Paul, Andrei, Ricardo, Zhou, Ping, Nanda and Sutanuva, Eleonora, Ruben, Soraya, Vlien, Colet, Cristina, Fabrizio, Gennady, Arjen, Stanimir,…

I would like to express my gratitude to the technicians who make sure everything runs smoothly and efficiently in the lab: Erik, Fatna, Lidy and Taasje, thank you very much. I am grateful to Jan Meine, Jan G. and Els for taking care of the NMR equipment. Many many thanks to Han for having been so efficient with mass analysis.

At this point, I would like to thank my students: Liane, Hocine and Kasper. I wish you all the best for the future!

Je tiens aussi à remercier mes amis qui ont fait le voyage depuis la France (ou d’autres pays) pour me rendre visite: Elo et Romain, Orianne et Mick, Léa, Clémence, Cécile, Hélène et Xavier, Cédric, Charlotte et John, Laura et Blandine, Magali et Paul…

Un grand extra merci à Charlotte pour le dessin qui orne cette thèse!
Merci à ma famille : Papa, Maman, Laura, Antoine, merci pour votre soutien.
Et finalement, merci à Jacques pour m’avoir aidé à garder un bon équilibre dans ma vie, pour m’avoir rassuré quand ça n’allais pas, pour m’avoir supporté quand j’étais chiant et surtout, pour m’avoir apporté autant de moments de joie.
