Lay-out: Jan Bruin (www.bred.nl)

Should I stay or should I go? The role of dispersal and cannibalism in exploitation strategies of a predatory mite

ACADEMISCH PROEFSCHRIFT

ter verkrijging van de graad van doctor
aan de Universiteit van Amsterdam
op gezag van de Rector Magnificus
prof. dr. ir. K.I.J. Maex
ten overstaan van een door het College voor Promoties ingestelde commissie,
in het openbaar te verdedigen
in de Agnietenkapel

op woensdag 6 december 2017, te 10:00 uur

door

Alexandra Margarita Revynthi

geboren te Athene (Griekenland)

TABLE OF CONTENTS

06	Author addresses
09	1 General introduction
19	2 Prey exploitation and dispersal strategies vary among natural populations of a predatory mite
39	3 Timing of aerial dispersal is a heritable trait in the predatory mite <i>Phytoseiulus persimilis</i>
51	4 Gender-specific differences in cannibalism between a laboratory strain and a field strain of a predator
61	5 To cannibalize or disperse? Males cannibalize and females disperse in the predatory mite <i>Phytoseiulus persimilis</i>
73	6 General discussion
85	Summary
88	Samenvatting
91	Author contributions and project funding
92	Acknowledgements
95	Curriculum vitae
