Curriculum Vitae

Appendix

Curriculum vitae

Jantje Baukje (Janneke) Krikken was born on the 3th of May, 1980, in Jipsingboertange, the Netherlands.

After finishing the VWO (Esdal college Emmen, the Netherlands), she started dental school in Groningen (Rijksuniversiteit) in 1998. Her interest in paediatric dentistry and scientific research started there. During dental school, she organized her own traineeship in special care dentistry. She followed the Junior Scientific Materclass and laboratory course. A studentship was obtained and she wrote her first scientific publication. After receiving her dental degree in 2003, she worked as a dentist in general practices and as a teacher at the dental school in Groningen. In 2005, she started at ACTA with the specialty program in paediatric dentistry. In 2008, she received her master's degree in paediatric dentistry.

During the master's program in paediatric dentistry, she started her research on parental rearing style in relation to child dental anxiety and behaviour management problems. After receiving her master's degree, she worked as a teacher in the master program in paediatric dentistry and in several secondary dental care clinics. In 2009, she started together with a colleague her own paediatric dental care clinic in the Sint Lucas Andreas Hospital in Amsterdam, the Netherlands.

She presented her research regularly at national and international conferences. In the future, she would like to combine her work in paediatric dentistry, teaching in the master's program and scientific research.
