Figure 1.1: The mosaic of sign language data ................................................................. 3
Figure 1.2: Map of Canada’s provinces and territories ....................................................... 10
Figure 1.3: Map of Nunavut, with fieldwork locations indicated .................................... 11
Figure 1.4: Pictures from the Nunavut Travel Picture Task ............................................ 20
Figure 1.5: Pictures from the Volterra Picture Task .......................................................... 21
Figure 1.6: Pictures from the Zwitserlood Picture Task .................................................... 22
Figure 1.7: An addressee-sheet from the Give-Take Task ................................................. 23
Figure 2.1: IUR curved or lax handshapes ........................................................................ 30
Figure 2.2: IUR signs with an unusual (iconic) location ..................................................... 32
Figure 2.3: SALT .............................................................................................................. 32
Figure 2.4: IUR mouth gestures ....................................................................................... 33
Figure 2.5: INUKSHUK ................................................................................................. 34
Figure 2.6: IUR non-manual marker referring to death ...................................................... 34
Figure 2.7: Body-anchored signs with a movement on the midsagittal plane .................. 39
Figure 2.8: The body-anchored sign CHAR (begin and end locations) ............................ 39
Figure 2.9: Non-body anchored IUR signs with complex movement .............................. 40
Figure 2.10: Two-handed IUR signs articulated in midsagittal signing space that do not allow for reduplication for pluralisation .................................................. 40
Figure 2.11: Begin and end locations of the unbalanced two-handed sign PLANT ........... 41
Figure 2.12: Picture of the end locations of the base and reduplicant of the lateral sign WEEK++. ........................................................................................................ 41
Figure 2.13: PERSON .................................................................................................... 42
Figure 2.14: One-handed signs that are articulated in lateral signing space in the singular form, marked for plural by adding the non-dominant hand .................................. 42
Figure 2.15: Singular form of SEAL and classifier predicate used to express the plural of SEAL .................................................................................................................. 43
Figure 2.16.b: Overview of plural marking strategies in IUR ........................................... 45
Figure 2.17: NEG-1 (start and end locations) .................................................................... 49
Figure 2.18: IUR frown, non-manual ‘no’ ....................................................................... 49
Figure 2.19: IUR signs WAIT-NEG and PALMS-UP ....................................................... 51
Figure 3.1: Kinship markedness hierarchy ...................................................................... 56
Figure 3.2: Inuksuit kinship terms: male (△) and female (○) Ego .................................... 58
Figure 3.3: SIBLING ...................................................................................................... 61
Figure 3.4: ELDER (begin and end locations) ................................................................. 61
Figure 3.5: SPOUSE ...................................................................................................... 62
Figure 3.6: The IUR signs for FEMALE and MALE ....................................................... 63
Figure 3.7: Different locations for the sign PERSON ....................................................... 64
Figure 3.8: Basic colour term hierarchy ......................................................................... 67
Figure 3.9: BLACK ....................................................................................................... 71
Figure 3.10: RED, start and end location ....................................................................... 71
Figure 3.11: Common time-lines in sign languages ......................................................... 76
Figure 3.12: DAY, begin and end location ..................................................................... 77
Figure 3.13: WEEK, begin and end location ................................................................. 78
Figure 3.14: MONTH, begin and end location ............................................................. 79
Figure 3.15: SUNDAY ................................................................................................. 80
Figure 3.16: IUR variants for 12:00 .............................................................................. 80
Figure 3.17: The sign NEXT-DAY .............................................................................. 81
Figure 3.18: Numbers 1-5 in variant I (first row) and variant II (second row) ......... 89
Figure 3.19: Numbers 6-10 ......................................................................................... 90
Figure 3.20: ZERO ....................................................................................................... 91
Figure 3.21: Numeral incorporation in the sign DAY .................................................. 93
Figure 3.22: Begin and end locations of FOUR-WEEK ............................................... 93
Figure 4.1: The agreement hierarchy ........................................................................ 99
Figure 4.2: Locations of grammatical person in signing space .................................... 100
Figure 4.3: Spatial relation between a plant and a chair ............................................. 104
Figure 4.4: Distribution of verb types across the different verb classes in percentages... 106
Figure 4.5: Video stills showing the inflected forms of USE-ICE-AUGER ................. 109
Figure 4.6: Video stills of the uninflected and inflected forms of BE-LOUSY ............... 110
Figure 4.7: TALK.RECIP ......................................................................................... 113
Figure 4.8: GET, begin and end locations .................................................................. 113
Figure 4.9: AUX ......................................................................................................... 114
Figure 4.10: Video stills of PUT-eye:HC e CLEAR-UP PALMS-UP ......................... 125
Figure 4.11: The b1-classifier as used in example (42.a) and (42.b) respectively ....... 130
Figure 4.12: The sign BE-LOCATED:EC 1-ON-EC f ............................................... 131
Figure 4.13: The sign SEAL and the b-classifier ....................................................... 132
Figure 4.14: Still of initial and near-final position of the classifier predicate

    MOVE:EC b1-ON-TOP-OF-EC b1 ................................................................. 134

Figure 4.15: Start position of classifier predicate meaning ‘two-legged being bumps
into a wall’. .............................................................................................................. 134

Figure 4.16: Combined schematic representation of the continua for entity classifiers
and verb agreement ............................................................................................... 138
Figure 5.1: Lexical variation for the sign CARIBOU ................................................. 142
Figure 5.2: Examples of IUR signs borrowed from ASL ............................................ 151
Figure 5.3: IUR non-manual 'no' ............................................................................. 154
Figure 6.1: The proposed mosaic of sign language data ............................................ 160

Table 1.1: Participants’ characteristics ...................................................................... 16
Table 1.2: The different types of data recorded, and the time per community .............. 18
Table 2.1: Handshapes in IUR .................................................................................. 28
Table 3.1: Greenberg's markedness theory and hierarchies of categories .................. 55
Table 3.2: Greenberg's possible kin types for FATHER and UNCLE'S .................... 56
Table 3.3: Greenberg's kinship types for grandparental terms .................................. 57
Table 3.4: Inuktut colour terms ............................................................................... 68
Table 3.5: Some Inuktut numbers ............................................................................ 85
Table 3.6: Numbers 1-10 in three sign languages .................................................... 86
Table 4.1: Example of rich and poor agreement systems: Paradigm for the verb ‘to stroll’ in Dutch (wandelen) and Spanish (caminar)................................. 99
Table 4.2: Distribution of verb types in Auslan, YSL and IUR. ........................................ 119
Table 4.3: Examples of NGT handling and entity classifiers. ........................................ 123
