At the Amsterdam Archaeological Centre of the University of Amsterdam there has been a long tradition of research into the Oer-IJ area. In 1999 I started working at the excavation at Beverwijk/Heemskerk-Broekpolder as a field administrator. My slight handicap that prevented me from actual digging, was never seen as a problem by my colleagues and they would happily cut of an extra centimeter of soil when I wanted to review a feature. They gave me the opportunity to become a field worker and for this I owe them gratitude.

This thesis is an extension of the research into the Oer-IJ area and was made possible by the funding of the Netherlands Organisation for Scientific Research (NWO) and the University of Amsterdam. It is part of the stimulation programme ‘Protecting and developing the Dutch archaeological-historical landscape’ and more specific the project: ‘From Oer-IJ estuary to metropolitan coastal landscape: assessing and preserving archaeological-historical resources from 4000 years living between land and water.’ I want to thank my colleagues within this project Gerard Alders, Tom Bloemers, Robert van Heeringen, Heleen van Londen, Linda Therkorn and Liesbeth Theunissen for their discussions. I thank all the other PhD-students participating in the program for their sharing of experiences and companionship at the periodic gatherings.

Without the work of Peter Vos and Jenny Hettelaar this research would not have been possible as they made all the geological maps. I would like to thank my promotor Tom Bloemers and supervisor Linda Therkorn for their detailed comments.

I would also like to thank the following persons for their sharing of information by discussion, sending articles or showing me around on sites: Elles Besselsen, Wim Bosman, Peter van den Broeke, Jay Butler, Ron Duijndam, Rob van Eerden, Sander Gerritsen, David Fontijn, Jos Kaarssemaker, Jan de Koning, Silke Lange, Mark van Raay, Tim de Ridder, Wijnand van der Sanden, Carla Soonius, Hannie Versteegen, Baduhenna, Werkgroep Oer-IJ and Werkgroep Oud-Castricum. The members of the DAR-discussion group: Ellen Thiermann, Erik van Rossenberg, Jeremia Pelgrom, Leon van Hoof, Maartje Hoogsteyns, and Tesse Stek are thanked for their close-reading of the first chapter and nice meals. Jan-Willem van der Schans for a bikeride at a crucial moment. Masja Parlevliet for the hours long talks in the car travelling from Rotterdam to Amsterdam. My other colleagues at the AAC/projectenbureau for their interest and the valuable connection with the archaeological field. Nienke Terpsma with her eye for detail is thanked for comments on the lay-out.

I want to thank my family: Pa, Ma, Els, Caroline, Dolf, José, Conrad and Saskia, their partners and children for showing me diversity and similarity from a young age onward.

And last but certainly not least I thank my wife Line Kramer who not only made all the drawings and the lay-out of this thesis, but supported me all the way.
