Finally is time to say thank you to all the people that in a way or another contributed to this thesis, which would not be possible to build just by my own. More than four years has passed since I started my PhD in Amsterdam, but it seems yesterday that 1st of April 2008. Well, they say: time flies when you are having fun. I did enjoy my time as a PhD student and it was for me a very enriching experience.

Dear professor Aerts, dear Hans, I would like to thank you for our stimulating discussion and your critical comments. Thank you for your help and time in revising my thesis. I value the opportunity to have worked with you and with your talented team.

Dear professor Groen, Bert, thank you for the enthusiasm you had and you transmitted to the small metabolism group, I have learned a lot from our weekly meetings. Thank you for your support and guidance any time I have asked you for your input.

Dear Flo, well where should I start... Thank you for all the time, the energy and dedication you put in supervising me. I appreciate your way of working, your fresh mentality and your sharp thinking. You are a very talented scientist and you taught me a lot. I extremely enjoyed working, running, eating, going to congress and shopping together. Merci.

To the Medical Biochemistry department of the AMC. You are great people to work with, I learnt a lot from all of you (even if too early for the start of the week, the Monday morning meetings are quite useful;)), I had great borrels, dinners and pleasant coffee breaks. I think you make a great team and a very stimulating working place. Annette, Duco and Romana, thank you to take care of all the important issues going around in such a big department. Arthur, thank you for your input during the cholesterol meetings and for revising our papers. Vivian and Rolf, thank you to assist me with the last papers. Your comments and suggestions were really useful. I really appreciate collaborating with you. Marri, thank you to be always available for any questions or problem in the lab; Milka, Carlos and Marco, “the metabolism patriarchs”, thank you for all you inputs and
your kindness in taking time to help me when I needed it!!! Nick and Gertjan thank you for analyzing my samples and giving me useful feedbacks! Mina thank you for assisting me anytime I had to analyze the “lovely” gangliosides. Roelof, the animals master thank you for arranging all the animal experiments, you do a great job!!! Wilma, Anneke and Tineke, we can all profit from your experience, thanks to be always ready to help! Wouter it was good to have some chats sometimes and share some PhD frustrations!!! Good luck with your thesis! Special thanks to my roommates: Anneke, Karen, Edward, Maria and Tanit!!!!! It was very comforting to know that there was always somebody ready to listen and to talk to; you were all very tolerant with my music selection!!!! You are the best!!! Tanit and Maria, good luck with your PhD and with your future plans, whatever they are. To all the other member of the department: Babu, Iker, Anouk, Stijn, Marc, Daniela, Vincenzo, Rossella and Alessandra (the Italian crew!), Paulo, Teja, Jessica, Andre, Emma, Saskia, Lilit, Annete, Mariska, Yudo, Judith and Marielle, (now working somewhere else but very nice colleagues!!!) Carmen, Matthijs, Ana, Claudia, Boris, Noam, Dave, Ans and everybody else thank you because in one way or the other you contribute to my studies and you made my staying in the department a pleasure!

To my dear lunch club members: Flo, Cindy, Saskia, Shreyas, Maria and Areti. We started running together we ended it up having south European lunch breaks (to be expected ;)). Our lunch days were the best; I always enjoyed eating your dishes (even the low carb/low fat, the extra salty fish soup or zuurkool met zalm). I will certainly miss the time we shared together!!! Thank you cooking princesses!!!

To the people that helped me with special analysis: Hans Levels from the department of Experimental Vascular Medicine, thank you for your lipoprotein profile, Wim Kulik from the Lab. Genetic Metabolic Diseases, thank you to measure the fecal sterols, Dirk de Waart and Coen Paulusma and Cindy Kunne, from the Tytgat Institute for Liver and Intestinal Research, thank you for analyzing our bile samples, your comments and suggestions. To Erwin G. Zoetendal, from Molecular Microbial Ecology Group at Wageningen University, thank you for your analysis on the fecal microbiota, the outcome looks very promising, Edward good luck following it up! To Maxi, it was nice collaborating with you, thank you for suggesting me to try yoga, I hope one time I will be able to attend your class!!!

To my paranimfen, Cindy and Saskia thank you to be there in the moment of truth!!! It is a relief to know that you will be there to assist me and support me on such important day.
To Frank, thank you my dear, for supporting me and encouraging me anytime my mood was a little low. You knew I could do this before I did. I hope you will like the book when it is finished, even if it is not as “strak” as you wish.

E infine (ma non per importanza), il grazie piú grande va alla mia famiglia, lontana solo fisicamente. Papà grazie per aver “le spalle grosse”, sono servite molto spesso e non hanno mai mancato al dovere! Mamma quando ancora il termine multitasking non era di moda tu ne eri già l’esempio piú ecclatante, grazie per tutto quello hai fatto e che continui a fare per noi. Grazie a tutti e due per averci insegnato l’importanza di un educazione e il valore del lavoro. Cira, Mary grazie per esserci sempre e per sostenermi in ogni mia scelta, consigliandomi come nessuno sa fare. Vi amo!
