About the author

Rosanne Y. Hertzberger (1984, Rotterdam) completed a BSc and MSc in Life science & Technology from Delft University of Technology and Leiden University, including courses at the École nationale du genie rural, des eaux et des fôrets in Paris. During her master thesis she studied micronutrient accumulation in *Saccharomyces cerevisiae* at the Nestlé Research Centre in Switzerland. In April 2009 she started her PhD project as a collaboration between the Nestlé Research Centre and NIZO Food Research, carried out as a part of the Molecular Microbial Physiology lab of the Swammerdam Institute for Life Sciences, University of Amsterdam. During her PhD studies she wrote a weekly column for the Dutch newspapers NRC Handelsblad and nrc.next. From July 8th 2014, she will start a postdoctoral research project on the role of vaginal lactobacilli in women's health at the Centre for Women's Infectious Disease Research at Washington University in St Louis, Missouri, USA.
