# Contents

1 Background and Methods 3
   1-1 Chemistry in Aqueous Solution 4
   1-2 Silica Oligomerization and the Role of Sodium 5
   1-3 Ruthenium Catalyzed Transfer Hydrogenation of Ketones in Water 8
   1-4 Methods
      1-4.1 Electronic Structure 10
      1-4.2 Transition State Theory 14
      1-4.3 Molecular Dynamics 15
      1-4.4 Rare Event Methods 17
   1-5 Previous Studies of Chemistry in Explicit Water Solution 22
   1-6 The Scope of This Thesis 24
   1-7 References 25

2 Silica Oligomerization in Presence of Sodium 31
   2-1 Introduction 32
   2-2 Methods 33
   2-3 Results and Discussion
      2-3.1 Validation 35
      2-3.2 Free Energy Calculations 35
      2-3.3 Analysis of Sodium’s Behavior 37
   2-4 Conclusions 42
   2-5 References 43

3 Ruthenium Catalyzed Transfer Hydrogenation 47
   3-1 Introduction 48
   3-2 Methods 49
   3-3 Results and Discussion
      3-3.1 Transfer Hydrogenation 50
      3-3.2 Catalyst Deprotonation 55
   3-4 Conclusions 57
   3-5 References 59
# 4 Reactive Path Sampling of Transfer Hydrogenation.

- **4-1 Introduction** ........................................... 62
- **4-2 Methods** ............................................... 65
- **4-3 Results and Discussion** ................................. 68
  - 4-3.1 Transition Path Sampling Simulations .................. 68
  - 4-3.2 Analysis of the Reaction Coordinates .................. 72
- **4-4 Summary and Conclusions** .............................. 77
- **4-5 References** .............................................. 78

# 5 Regeneration of RuTsDPEN in Transfer Hydrogenation

- **5-1 Introduction** ........................................... 82
- **5-2 Methods** ............................................... 85
- **5-3 Results and Discussion** ................................. 87
  - 5-3.1 Dissociation of the Ruthenium-Formato Complex ........ 87
  - 5-3.2 Hydride Transfer to the Protonated Catalyst .......... 90
  - 5-3.3 Hydride Transfer to the Deprotonated Catalyst ....... 92
- **5-4 Discussion and Conclusions** ............................ 95
- **5-5 References** .............................................. 96

# Summary

- **Samenvatting** ............................................. 105

# Acknowledgments

- **Acknowledgments** .......................................... 111
