Acknowledgements

A large part of the work presented in this thesis was performed under the EU project PERFOOD (KBBE-227525), the financial support of the European Union is gratefully acknowledged. This work was also performed in the TTIW-cooperation framework of Wetsus, center of excellence for sustainable water technology. The participants of the research theme “clean water technology” are acknowledged for the fruitful discussions and their financial support.

Wellington-laboratories is gratefully acknowledged for the gift of several analytical standards. Nicole Riddell from Well-labs is acknowldeged for helping out with the analytical questions.

Students who helped with the work in this thesis, particularly Maria Hoppe from Germany, Els van der Roest, Inge van Driezum and Jort Hammer who made me work harder in order for me to be able to keep up with them.

Erik and Walter for the shared Tyskies and Chiara and Andrea for the coffee. Joris Haftka as well!

The technicians from the UvA, especially Rick, Frans, Joke en Leo the man for support and the like! All UvA-IBED- ESS colleagues of course also!

My colleagues from KWR Watercycle Research Institute. Especially Erik, Annemieke, Merijn, Thomas, Patrick, Kees, Minne, Stefan, Leo, Annemarie, Jos and Kirsten.

My family: Fleur, PJ, Jonathan, Anne, Roos, Piedro, Tijn, Linda, Demi, and last but not least Oscar for the editing and all the rest(!) and of course familie Diemel. The Eschauzier “familie fonds” for all the support over my student years which greatly helped me develop the skills needed for this thesis.

Sebas F. for being able to endure me such a long time
and, most important of all: Pim!

Finally, the one and only Jose for keeping order in general.

Christian Eschauzier
