You will be contacted as soon as possible.

## **ABOUT THE AUTHOR**

Krijn van Beek was born on January 27, 1963 in Bennekom. From his parents, who both earned masters degrees in Physics, he inherited a propensity for the abstract. After graduating from Gymnasium in Ede, he took one year of Mathematics and Physics at Western Maryland College (Maryland, USA). Thereafter he studied Mathematics at the State University of Groningen. In 1987 he earned a masters degree in Systems Analysis. Military draft brought him to Den Helder, where he taught Mathematics at the Royal Naval Academy. In 1988 he started working at the Netherlands Scientific Council for Government Policy, at first primarily on labor market issues, but lately also on decision making with regard to large infrastructural projects and on the Dutch system of higher education.
