Grandparents as parents: Skipped-generation households coping with poverty and HIV in rural Zambia
Reijer, D.B.J.

Citation for published version (APA):
List of figures

1.1 Estimated adult (15 to 49 years) HIV prevalence rate, Zambia, 1990 to 2011  8
1.2 The increasing importance of grandparents: Relationships of double orphans and single orphans (not living with surviving parent) to the head of the household, Namibia, 1992 and 2000  16
2.1 Map of Zambia, showing population density by province, including the Copperbelt province  49
2.2 Sketch of the area of Misangwa  50
3.1 Materials used for walls and roofing of housing (2001 and 2009)  66
3.2 Population pyramids of the population covered in the 2001 and 2009 household surveys  69
3.3 The population chimney: Projected population structure for Botswana in 2020, with and without AIDS  71
3.4 Population size with and without AIDS, South Africa, 2000 and 2025  72
3.5 Declining HIV-related mortality in Zambia between 1990 and 2011  73
3.6 Pie charts on the incidence and nature of orphanhood in 2001 and 2009  77
3.7 Heads of households where OVCs live in 2001 and 2009  81
4.1 Make-up of Ba and Bana Thomson’s household in 2009  96
4.2 Family tree of Bana Marjory’s household  102
5.1 Wealth ranking of skipped-generation households (n=65) and all other households included in the 2009 household survey (n=180)  113
5.2 Proportion of heads of skipped-generation households, by age categories  116
5.3 Highest levels of education attained by heads of skipped-generation households (n=65)  117
5.4 Distribution of the population aged 60 to 64 and 65 and over, by sex, and by the highest level of schooling attended or completed, Zambia 2007  118
5.5 Proportion of members of the younger generation, by age categories  119
6.1 Issues that emerged from the life histories (text size corresponds with the number of respondents who mentioned the issue)  138
7.1 Personal and shared microsystem settings and actors for a granddaughter (12 years) and her grandfather (74 years) living in a skipped-generation household  199
7.2 Microsystem settings and actors, and mesosystem linkages, around Maxwell  202
7.3 Intergenerational transfers and the transactional model of child development: Two hypothetical examples of farming knowledge passed down (or not) by parents 209
7.4 Intergenerational transfers and the transactional model of child development: Two hypothetical examples of the influence (or lack thereof) of interactions with neighbours 210
