Grandparents as parents: Skipped-generation households coping with poverty and HIV in rural Zambia
Reijer, D.B.J.

Citation for published version (APA):
List of tables

2.1 Overview of FGDs conducted 56
2.2 Respondents of in-depth interviews 57
3.1 Basic survey description for the 2001 and 2009 household surveys 65
3.2 Results of socio-economic profiling of households in 2001 and 2009 67
3.3 Sex and child–adult proportions for the sample population in 2001 and 2009 68
3.4 Sex, age range, and average age of head of household in 2001 and 2009 68
3.5 Age distribution of all respondents in 2001 and 2009 70
3.6 Age categories of children in 2001 and 2009 74
3.7 Sex distribution of children in 2001 and 2009 74
3.8 Enrolment rates of children aged 7 to 13 in 2001 and 2009 75
3.9 Reported reasons why children aged 7 to 13 years were not attending primary education in the 2001 and 2009 75
3.10 Numbers and nature of orphanhood in 2001 and 2009 77
3.11 OVCs in 2001 and 2009 80
3.12 Relationship between children and the head of the household where they lived in 2001 and 2009 81
3.13 Number of OVCs per household in 2001 and 2009 82
3.14 Demographic characteristics of households headed by an elderly person (aged 60 years and older) in 2001 and 2009 83
4.1 Bana Ebenah’s household in 2001 and 2009 92
5.1 Composition of the 65 skipped-generation households studied (n=65) 110
5.2 Sex of the members of skipped-generation households (n=352) and household heads (n=65), by generation and gender 110
5.3 Housing conditions of skipped-generation households (n=65) 111
5.4 Sources of food and cash for the skipped-generation households (n=65) 112
5.5 Socio-economic ranking for skipped-generation households (n=65) and all other households included in the 2009 household survey (n=180) 113
5.6 Age distribution of members of the older generation, by sex (n=91) 115
5.7 Age distribution of heads of skipped-generation households, by sex (n=65) 115
5.8 Marital status of the heads of skipped-generation households, by sex (n=65) 116
5.9 Age distribution of members of the younger generation in skipped-generation households, by sex (n=261) 119
5.10 Age distribution for all children (aged zero to 17 years) in skipped-generation households (n=221) 120
5.11 Orphan status of members of the younger generation of skipped-generation households, by sex (n=261) 120
5.12 Living arrangements of members of the younger generation of skipped-generation households, in relation to the presence or absence of their biological parents, by sex (n=261) 121
6.1 Changes in the community that heads of skipped-generation households have seen during their lives (n=28) 149
6.2 Issues at the personal level mentioned by heads of skipped-generation households (n=28) 152
6.3 Household problems mentioned by heads of skipped-generation households (n=28) 155
6.4 Community level problems mentioned by heads of skipped-generation households (n=28) 157
6.5 The number of interactions, in the week prior to data collection, between guardians in skipped-generation households (n=15) or parents/guardians in other households (n=10) with people outside of the household 159
7.1 Status and/or whereabouts of parents of (virtual) orphans, from the 2009 household survey (n=300) 174
7.2 Microsystem settings and relevant actors for children and young people, found through free-listing (n=60) 179
7.3 Number of interactions between children and young people and others in the course of one week, mentioned by respondents in their diaries (n=60) 180
A.1.1 Expected ‘worst’ results and corresponding required sample sizes 253
A.1.2 Possible changes in Misangwa since 2001 and corresponding sample sizes 254
