# Contents

1 General Introduction and Thesis Outline 1

2 Monetary Policy, Banking and Heterogeneous Agents 11
   2.1 Introduction .................................................. 11
   2.2 The model ..................................................... 13
      2.2.1 The IS curve ............................................. 15
      2.2.2 The Phillips curve ....................................... 18
      2.2.3 The banking sector curve ............................... 19
   2.3 The influence of heterogeneity ............................ 21
   2.4 Numerical analysis .......................................... 23
      2.4.1 Formation of expectations ............................... 23
      2.4.2 Calibration and numerical results ...................... 24
   2.5 Conclusions and discussion ............................... 27

Appendix 2.A Baseline derivation .................................. 30
Appendix 2.B The influence of heterogeneous agents ............ 33
   Appendix 2.B.1 The heterogeneous IS curve .................... 33
   Appendix 2.B.2 The heterogeneous Phillips curve ............... 35
   Appendix 2.B.3 The heterogeneous banking sector curve ....... 36
Appendix 2.C Model dynamics ....................................... 37

3 Nonlinear Granger Causality - Guidelines for Multivariate Analysis 39
### Contents

3.1 Introduction ....................................................... 39
3.2 Asymptotic properties of the DP test .............................. 41
   3.2.1 The dimensionality problem ................................ 44
3.3 Data sharpening as a bias reduction method ....................... 45
   3.3.1 Bandwidth selection ....................................... 48
   3.3.2 Performance of the DS in Granger causality setting ........ 49
3.4 Nonlinear Granger causality in the US grain market ............. 51
3.5 Conclusions and discussion ................................... 56

Appendix 3.A Asymptotics of the sharpened test (Corollary 3.3.1) ........ 58
Appendix 3.B Application of bias reduction .......................... 60
Appendix 3.C Illustration of the empirical results .................... 63

4 Exploring Nonlinearities in Financial Systemic Risk ............... 69
  4.1 Introduction ..................................................... 69
  4.2 Methodology of NCoVaR ........................................ 73
     4.2.1 Optimal bandwidth ....................................... 79
  4.3 Numerical simulations ......................................... 80
     4.3.1 Performance of the NCoVaR test ........................... 82
  4.4 Assessing financial systemic risk ................................ 86
  4.5 Conclusions and discussion ................................... 90

Appendix 4.A Asymptotic properties of test statistic (Theorem 4.2.1) .... 92
Appendix 4.A.1 Dependence ......................................... 93
Appendix 4.B Optimal bandwidth sequence (Corollary 4.2.1) ............ 94
Appendix 4.C Data description and results .......................... 95

5 Do Safe Havens Make Asset Markets Safer? .......................... 101
  5.1 Introduction ..................................................... 101
  5.2 Data .............................................................. 104
