Child and Adult Heritage Spanish in the Netherlands: The Development of Subject Position
Brechje van Osch, Elisabet García González, Suzanne Aalberse, Aafke Hulk & Petra Sleeman
University of Amsterdam

Heritage speakers
Speakers of a minority language, acquired during childhood in a naturalistic setting in the home context.

Subject position in Spanish
Spanish has flexible word order:

- Un chico llegó
- V

Subject position with intransitives in Spanish is constrained by unaccusativity, focus, definiteness, animacy, verbal aspect, adverbial phrases, and subject heaviness (Hinch, 2005; Lozano, 2006; Domínguez, 1998; Serratrice & Montrul, 2011; Brechje van Osch, 2012).

This makes subject position a highly complex phenomenon, prone to vulnerability in (bilingual) acquisition.

Previous Research:
Children
Monolingual
- Have knowledge of verb type by age 2
- Born and raised in Spain

- No previous research on other factors

Bilingual
- No previous research

Adults
Monolingual
- Verb type & focus influence word order (Hertel, 2005; Lozano, 2006)
- Many other factors, such as definiteness as well (Rogge, 2011)

Bilingual
- Do not have monolingual-like knowledge of all the factors determining word order (Otaño et al., 2003; De Prada Pérez & Pascual y Cabo, 2012)
- Overgeneralization of pronominal subjects (Hinch & Aalberse, 2005; Aalberse, 2005; Otaño et al., 2003)

Simplification or cross-linguistic influence?

Subject position in Dutch

- Een jongen a boy
- S
- float
- whistled

but V2!

- Butuiten/er/dat Outside/There-that
- Adv/OBJ
- float
- whistled
- een jongen a boy

More evidence for postverbal subjects

Research Questions
1. Will Dutch HS of Spanish show less overgeneralization of preverbal subjects (but deviate from monolinguals)?
2. (When) do bilingual children deviate from monolinguals?

The present study

A) Adult Participants
- 24 heritage speakers
  - Born in the Netherlands, or arrived before 5
  - Mixed families
  - No Caribbean dialects
- 18 monolingual speakers of Spanish
  - Recently immigrated to the Netherlands.
  - No knowledge of Dutch
  - No Caribbean dialects

B) Child Participants
- 30 heritage speakers
  - 9 and 13 years old
  - Born in the Netherlands, or arrived before 5
  - Mixed families
  - No Caribbean dialects
- 44 monolingual speakers of Spanish
  - 9 and 13 years old
  - Born and raised in Spain
  - No knowledge of other languages

Method

Contextualized Scalar Acceptability Judgment Task:

El gato llegó

Three dogs are playing at the beach and having a lot of fun. While they play, their friend the cat comes and sees them and he gets very sad because they had not asked him to join them.

Results

Monolinguals

Bilinguals

Conclusions
1. Both monolingual and Dutch heritage speakers increase the preference of VS across the lifetime.

2. In Dutch bilinguals, this VS preference is more pronounced in all age groups.

3. This overgeneralization might be due to the influence of V2 in Dutch.
