Child and Adult Heritage Spanish in the Netherlands: The Development of Subject Position

Brechtje van Osch, Elisabet García González, Suzanne Aalberse, Aafke Hulk & Petra Sleeman
University of Amsterdam

Heritage speakers
Speakers of a minority language, acquired during childhood in a naturalistic setting in the home context.

Subject position in Spanish
Spanish has flexible word order:
- Un chico llegó 
  A boy arrived 
- Llegó un chico
  Arrived a boy

Subject position with intransitives in Spanish is constrained by unaccusativity, focus, definiteness, animacy, verbal aspect, adverbial phrases, and subject heaviness.

The present study
1. Will Dutch HS of Spanish show less overgeneralization of preverbal subjects (but deviate from monolinguals?)
2. (When) do bilingual children deviate from monolinguals?

Research Questions

The present study

B) Child Participants
30 heritage speakers
- 9 and 13 years old
- Born in the Netherlands, or arrived before 5
- No knowledge of Dutch
- No Caribbean dialects

44 monolingual speakers of Spanish
- 9 and 13 years old
- Born and raised in Spain
- No knowledge of other languages

Conclusions
1. Both monolingual and Dutch heritage speakers increase the preference of VS across the lifetime.
2. In Dutch bilinguals, this VS preference is more pronounced in all age groups.
3. This overgeneralization might be due to the influence of V2 in Dutch.
