Disclaimer/Complaints regulations
If you believe that digital publication of certain material infringes any of your rights or (privacy) interests, please let the Library know, stating your reasons. In case of a legitimate complaint, the Library will make the material inaccessible and/or remove it from the website. Please Ask the Library: https://uba.uva.nl/en/contact, or a letter to: Library of the University of Amsterdam, Secretariat, Singel 425, 1012 WP Amsterdam, The Netherlands. You will be contacted as soon as possible.

UvA-DARE is a service provided by the library of the University of Amsterdam (http://dare.uva.nl)
We study aspects of the grammar of natural sign languages, their acquisition and diachronic change, and in how far sign languages differ from each other in various grammatical domains.

**GRAMMAR & DESCRIPTION**

**ENOC ABOH, VADIM KIMMELMAN, ULRIKA KLOMP, VANJA DE LINT, MARLOES OOMEN, ROLAND PF AU**

- **NGT GRAMMAR**
  - Project: Descriptive grammar of Sign Language of the Netherlands (NGT). Implementing previous research & conducting original research, e.g. on conditional clauses:
  - What are nonmanual markers of conditionals in NGT?
  - **Results:**
    1. Raised eyebrows seem optional (unlike in other sign languages);
    2. Head movement and/or tilt seems obligatory;
    3. When a manual marker is present, nonmanual markers are used less frequently.

- **BODY-ANCHORED VERBS**
  - How does iconicity (form-meaning relation) affect sign language structure?
  - Body-anchored verbs: (examples from NGT)
    - LOVE
    - RELIEVED
    - EAT
  - **Result:** only first person subject ('I') can be dropped due to iconic associations:

- **CLASSIFIER PREDICATES**
  - Classifier predicates: verbs of movement/location; the handshape classifies an argument
  - Research on ASL: systematic connection between argument structure and classifier type
  - **Results:** classifier predicates in Russian Sign Language & 4 other sign languages have complex event/argument structures

**SIGN LANGUAGE ACQUISITION**

**EVELINE BOERS-VISKER, BEPPIE VAN DEN BOGAERDE**

- **BIMODAL BILINGUALISM**
  - How do deaf mothers and their deaf and hearing children combine spoken and signed language?
  - **Results:** utterances can consist of following combinations:
    - Fully signed and fully spoken
      - Signs: YOU WALK TO CAMP^FIRE (NGT or NL word order)
      - Words: you walk to campfire
    - Mainly signed, with words produced simultaneously
      - Signs: YOU WALK TO CAMP^FIRE (usually NGT word order)
      - Words: fire
    - Mainly spoken, with signs produced simultaneously
      - Signs: WALK CAMP^FIRE (usually NL word order)
      - Words: you walk to campfire
  - **Mixed signs and words are produced simultaneously, but content differs, e.g.**
    - Signs: HUGGING
      - Words: you sweet rabbit
    Both signs and words are necessary for complete message.

- **SECOND LANGUAGE ACQUISITION**
  - How do adults who acquire a sign language as a second language learn to use the signing space to express grammatical relations?
  - 1. Case studies (n=2, longitudinal)
  - 2. Elicitation study (n=14, longitudinal) into classifiers and agreement verbs
  - 3. Intervention study (2018) - does explicit instruction help?

*This project is part of the project “The SIGN-HUB: preserving, researching and fostering the linguistic, historical and cultural heritage of European Deaf signing communities with an integral resource”, funded by European Commission Horizon2020 grant no. 693349.

#These projects are part of the project "Argument structure in three sign languages: typological and theoretical aspects", funded by the Dutch Science Foundation (NWO), grant no. 360-70-302.
