Key words. stars: pulsars: individual: PSR B0656+14 – stars: pulsars: general – radiation mechanisms: non-thermal – errata, addenda

A misprint was inserted in Table 2 during the printing process ([2mm] was wrongly placed before AO-P1). The correct table is as follows:

Table 2. The parameters of the best fits to the pulse-energy distributions of the four observations. Besides the parameters of the fitted distribution (where $f_{\text{weak}} = N_{\text{weak}}/N_{\text{tot}}$ is the fraction of weak pulses that are added to the distribution), also the total $\chi^2$, the number of degrees of freedom and the significance probability are tabulated.
