<https://doi.org/10.3758/s13428-020-01479-0>

The original online version of this article was revised:  
The following sentences from page 1396 were updated as indicated.

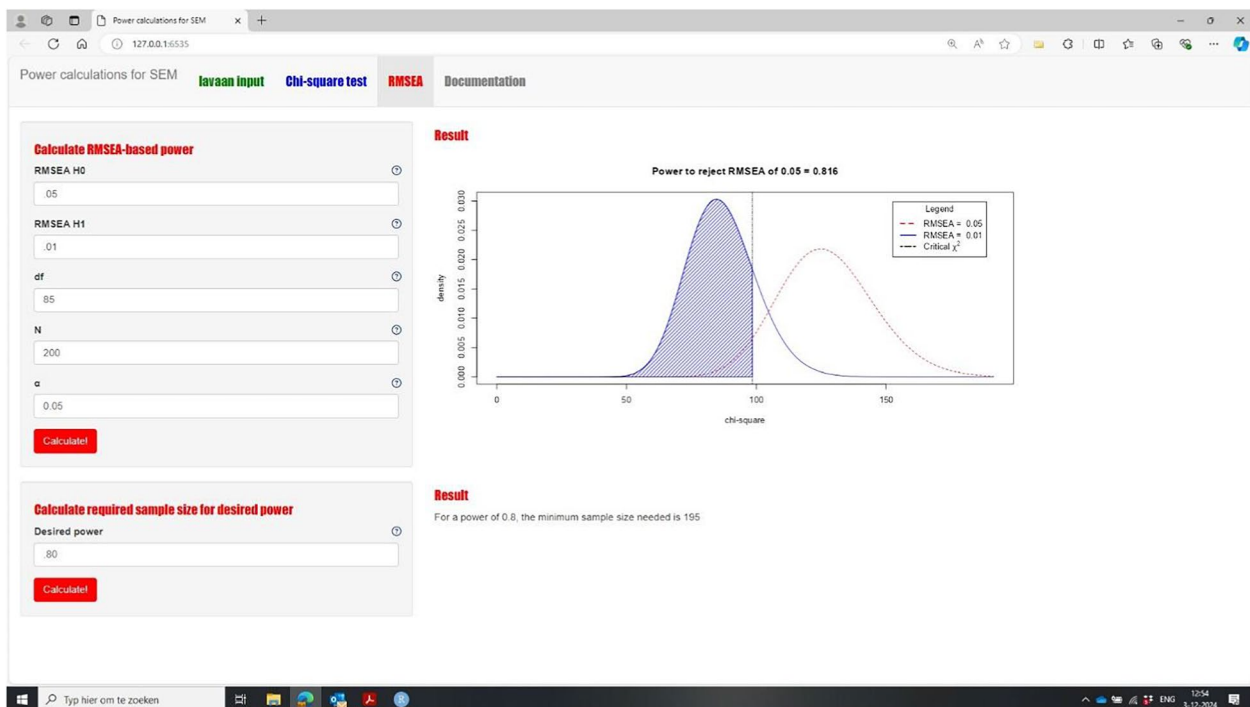

The model contains 25 freely estimated parameters. Was updated to: 35 freely estimated parameters.

Therefore, this model has  $120 - 25 = 95$  *df*. Was updated to:  $120 - 35 = 85$  *df*.

The resulting power to reject not-close fit equals 0.854. Was updated to: 0.816

The app indicates that for a power of 0.80, we would need a sample size of 183. Was updated to: 195.

The figure in **Example 4** has been corrected to show the changes made by the updates.

The original article can be found online at <https://doi.org/10.3758/s13428-020-01479-0>.
