*“That which we give makes us richer,
that which is hoarded is lost.”*

Shota Rustaveli (ca. 1160 – after 1220 CE)

Remembering

Professor dr. Austin Nevin

who sadly passed away in October 2024.

I am grateful for his guidance throughout my career and proud that he was a part of my Doctorate Committee. I will remember Austin for his contributions to conservation science and wall painting conservation, and above all for his generosity and kindness.

This research was funded by The Bennink Foundation/Rijksmuseum Fonds. Additional funding was provided by IPERION HS, funded by the European Union, H2020-INFRAIA-2019-1 under agreement no. 871034.

Table of contents

Chapter 1	Introduction	1
Chapter 2	Two paintings by Jan de Bray (1663): a case study of water-induced chemical deterioration?	25
Chapter 3	The distribution and transport of water in oil paintings: a numerical moisture diffusion model	61
Chapter 4	Evaluating the environmental response of Rembrandt's <i>The Night Watch</i> (1642) using water sorption experiments and diffusion modelling	91
Chapter 5	Nanoconfined water clusters in zinc white oil paint	143
Chapter 6	How to approach long-term monitoring of chemical dynamics in oil paintings?	177
Chapter 7	Synthesis and outlook	225
	Summary	235
	Nederlandse samenvatting	239
	List of publications	243
	Acknowledgements	247
	About the author	251
