Tendesayi Chakezha (nee Kufa) was born on the 5th January 1977 in Mutoko Zimbabwe. She attended Tamuka Primary and Howard High Schools before enrolling in at the University Of Zimbabwe School Of Medicine in 1996. She graduated and completed her medical training in 2000 and did her internship at Harare Central Hospitals. After completing her internship she worked in various capacities in non-governmental organisations involved in providing HIV care and treatment services in Zimbabwe. In 2006 she was awarded a fellowship to study towards a Master’s in Public Health at the University of California at Berkeley which she completed in 2007. She returned Zimbabwe and joined the University of Zimbabwe's department of community medicine. In 2009 she joined the Aurum Institute in Johannesburg as a research scientist. Her research interests are in the prevention and control of HIV-associated tuberculosis. She is married to Sebastian C. Chakezha and has one daughter Ropafadzo.

INVITATION
You are invited to the public defense of the thesis:

Studies on the prevention and control of human immune deficiency virus associated tuberculosis

Tendesayi Chakezha (nee Kufa)
Thursday 6th November 2014
1200 hours
“Agnietenkapel”,
Oudezijds Voorburgwal 231,
Amsterdam.
Studies on the prevention and control of human immune deficiency virus associated tuberculosis

ACADEMISCH PROEFSCHRIFT

ter verkrijging van de graad van doctor
aan de Universiteit van Amsterdam
op gezag van de Rector Magnificus
prof. dr. D.C. van den Boom
ten overstaan van een door het college voor promoties ingestelde commissie, in het openbaar te verdedigen in de Agnietenkapel
op donderdag 6 november 2014 om 12:00

door

Tendesayi Chakezha (nee Kufa)
geboren te Mutoko, Zimbabwe
Promotiecommissie

Promotor: prof. dr. M.W. Borgdorff

Co-promotores: prof. dr. G.J. Churchyard
dr. S. Verver

Overige leden: prof. dr. T.F. Rinke de Wit
prof. dr. J.M.A. Lange
prof. dr. P. Reiss
prof. dr. F.G.J. Cobelens
prof. dr. E.L. Corbett
dr. H. Getahun

Faculteit der Geneeskunde
# TABLE OF CONTENTS

Acknowledgements

Chapter 1: General Introduction

Chapter 2: Incidence of HIV-associated tuberculosis among individuals taking combination antiretroviral therapy: a systematic review and meta-analysis

Chapter 3: Incidence of tuberculosis among HIV-infected individuals with high CD4 counts: implications for policy

Chapter 4: Willingness to participate in trials and to be vaccinated with new tuberculosis vaccines in HIV-infected adults

Chapter 5: Isoniazid preventive therapy use among patients on antiretroviral therapy: a missed opportunity

Chapter 6: Undiagnosed TB among HIV clinic attendees: association with ART and implications for intensified case finding, isoniazid preventive therapy and infection control

Chapter 7: Diagnostic accuracy of a urine lipoarabinomannan enzyme-linked immunosorbent assay for screening ambulatory HIV-infected persons for tuberculosis

Chapter 8: Antiretroviral therapy and undocumented outcomes following tuberculosis treatment among HIV-infected patients receiving care at primary care clinics

Chapter 9: General discussion

Chapter 10: Summary

Hoofdstuk 10: Samenvatting

Chapter 11: Portfolio and CV
Acknowledgements

I would like to thank everyone who made the completion of this doctoral thesis possible. My heartfelt gratitude to the following:

- My promoter, Prof Martien W. Borgdorff for the constant guidance, support and encouragement throughout the development and writing of the thesis.
- My co-promoters Prof Gavin J. Churchyard and Dr Suzanne Verver for their guidance, support and encouragement.
- The doctoral committee members: Prof T.F. Rinke de Wit, Prof J.M.A. Lange, Prof P. Reiss, Prof F.G.J. Cobelens, Prof E.L. Corbett and Dr H. Getahun for time and effort in reviewing the thesis.
- My colleagues at the Aurum Institute’s epidemiological research unit. Special mention to Dr Salome Charalambous and Dr Violet Chihota for being so understanding and allowing me the time and space I needed to write.
- The research and data management teams at the Aurum Institute. Without their hard work and dedication, the four research projects included in this thesis would not have happened.
- My co-authors on the different research papers included in the thesis. The papers are much stronger and richer from all your inputs.
- The European and Developing Countries Clinical Trials Partnership and PEPFAR for funding the research studies included in this PhD.
- Ekurhuleni Health Department for supporting the research conducted in the clinics and allowing my research teams access to the clinics and the patients who participated in the studies.
- The participants who took part in the relevant studies and shared their lives and illness with me and my team in order to advance the field of TB/HIV care and treatment.
- My family and friends who supported me throughout. Special thanks to my husband Sabastian C. Chakezha and daughter Ropafadzo H. Chakezha for their support, patience and love. They endured my long hours of work and absences with such grace and humour and they made each day count.
