Over the past five years as a PhD student, this dissertation would not have been possible without the help and encouragement of many wonderful people. Here, I would like to express my deepest gratitude and appreciation to everyone who helped me along this journey.

First and foremost, I would like to express my deepest gratitude to my promoters, Prof. Teun Munnik and Prof. Harro Bouwmeester. Thank you for accepting me as a PhD student at UvA and for all the time and effort you dedicated to my project. Our discussions during the PhD meetings have been invaluable, and I've learned so much from your insights.
