ACKNOWLEDGEMENTS

I started this project in January 2020 – when European pandemics were a thing of the past and regulation of Artificial Intelligence a dream in the far future. During these five years, the world slowed down, stopped for a bit, and started moving again – sometimes at enormous speed. I also moved – houses, countries, continents – and I met many wonderful people along the way. I dedicate this book to all of you.

A first big thank you goes out to the University of Amsterdam for all the doors she opened to me. When I first walked into the Oudemanhuispoort in September 2013 as an 18-year-old I had never expected to stick around for so long. During these twelve years, I seized every opportunity the Amsterdam Law School offered – from arguing with the Dean in the Studentenraad to moving to South Africa through the Global Exchange Programme to conducting interviews with inspiring lawyers for the Nota Bene. Anniek de Ruijter, I'm happy our shared interest in international health law brought us together, first as your master's thesis student, later as your research assistant, and then as your promovenda. Thank you for inspiring me to start this wonderful journey. Johan Legemaate and Kristina Irion, my other supervisors, many thanks for your endless confidence in me and my research. Annette Schrauwen, Julia van Weert, Joris van Hoboken, Giacomo Di Federico, Mette Hartlev and Frédéric Erard, thank you for agreeing to be on my Doctorate Committee.

Merel Spaander, Pramiti Parwani, Clara Juarez Lopez, my dearest paranympths, you are the best roomies and travel buddies ever – thank you for your friendship. Your presence always lights up the office. Dear fellows at the Law Centre for Health and Life, I am happy we built this research centre from the ground together. Rolinka Wijne, Katrina Perehudoff and Corrette Ploem, thanks for your kind encouragement throughout these years, and Johan Legemaate for your never-ending enthusiasm in our pubquiz project. Alec, Bas, James, Jannet, Kaja, Laura, Mahsa, Majd, Saar, and Samira, thanks for the many laughs, office coffees (De Koffiejongens with oatmilk), and your inspiring personalities. Luna Willems, thanks so much for your help in the final steps of this book. Kaat van Delm, you are always welcome on my couch. Outside our cozy corner on the tenth floor, I'd like to thank fellow promovendi Eva

Vermeulen, Veerle van Waarde, and Wim Zimmermann for the long walks and talks during the quiet pandemic months. Sophie Dura, thanks for your support and friendship – I’m so glad our paths crossed, and I hope to see you in Brussels soon. Wiebe Hommes, Lara Talsma, and Teresa Cabrita, thanks for all your wise advice. Irene Asscher, thank you for our comforting talks and your support.

Janneke van Oirschot and Tim Reed, many thanks for giving me the opportunity to make my research come to life at Health Action International. Janneke, I’m happy to do all the exciting but exhausting trips to Brussels (and further) together with you.

I always said I wanted to “work abroad” and I’m happy to report that this research project brought me all over the world. I. Glenn Cohen and Carmel Shachar, thank you for hosting me at Harvard Law School and for your kindness during my research stay. Zeynep Kahveci, Angela Hefti, Katharina Jungo, and Jakob Merane – I’m grateful to have found your friendship all the way in Massachusetts. Mirko Faccioli, thank you for your warm welcome to the Università di Verona in the equally warm Italian summer of 2023. I’m also thankful to the foundations that allowed me to conduct research abroad: Stichting Makaria, Dr. Hendrik Mullerfonds, Banning de Jong Fonds (Cultuurfonds) and Ketel1 Studiefonds. Thanks to the Brocher Foundation for hosting me in this beautiful place at Lake Geneva, Switzerland, and allowing me to write the final words of this book with the best possible views. Thanks to my lovely Brocher housemates in April 2024: I thoroughly enjoyed our dinners, bike rides, and conversations. Julia Rijssenbeek, thanks for running these last miles together. Institute for Biomedical Ethics at the University of Basel – thanks for being so welcoming and always providing me with a space to work.

I’d also like to thank all the inspiring and kind people I met at conferences throughout the years. Thanks to het Madeleine Julie Vervoort Fonds, Amsterdam Centre for European Studies (ACES) and UACES for supporting me financially. My first conference abroad was one of the best ones – thanks to Nathalie Smuha and all the amazing participants of the KU Leuven Summer School on the Law, Ethics and Policy of Artificial Intelligence in 2021. Thanks to the organizers and participants of the

many EUHealthGov, ECPR, UACES, and EAHL conferences I attended over the years in places like Rome, Belfast, Ghent, Brussels, and Warsaw, for your inspiration and motivation. The people I have met there, and at other conferences in places like Firenze, Montréal, Baltimore, Basel, and New Haven, made me realise how lucky I am to be working in academia. Sofia Palmieri, you are the first 'digital friend' I ever made and I'm happy we shared this experience. Astrid Pilotin, I truly enjoyed writing with you on perhaps my favourite paper so far.

My dear old friends and newly discovered ones that were not mentioned before: Melin, Jaëla, Delia, Laurie, Dorsa, Bastiaan, Nina, Ali, Isabelle, Stephen – thank you for your friendship. La mia famiglia a Verona, grazie mille. Mijn familie in Amsterdam, papa, mama, Mirjam, Dylan, opa Harry, oma Nel, en Siri, veel dank voor jullie steun – elk op jullie eigen manier. Andrea, luce della mia vita, our love is the best consequence of this PhD journey.

Hannah van Kolschooten

Amsterdam, 1 September 2024

TABLE OF CONTENTS

<u>Chapter 1</u>	13
Introduction	

Part I
***The Normative Power of Patients' Rights Protection
in the European Union***

<u>Chapter 2</u>	39
Patients' Rights in the Human Rights-Based Approach to Health	

<u>Chapter 3</u>	56
A Common Framework for European Patients' Rights Protection	

Part II
***The Legal Position of Patients' Rights
in the Algorithmisation of Health***

<u>Chapter 4</u>	105
EU Regulation of Artificial Intelligence: Challenges for Patients' Rights	

<u>Chapter 5</u>	140
A Health-Conformant Reading of the GDPR's Right Not to be Subject to Automated Decision-Making	

<u>Chapter 6</u>	172
The AI Cycle of Health Inequity and Digital Ageism: Mitigating Biases Through the EU Regulatory Framework on Medical Devices	

<u>Chapter 7</u>	205
The Council of Europe's AI Convention: Promises and Pitfalls for Health Protection	

Part III
New Perspectives on Patients' Rights Protection
in the Age of Artificial Intelligence

<u>Chapter 8</u>	<u>218</u>
A Human Rights-based Approach to Artificial Intelligence in Healthcare: A Proposal for a Patients' Rights Impact Assessment Tool	
<u>Chapter 9</u>	<u>256</u>
Towards an EU Charter of Digital Patients' Rights in the Age of Artificial Intelligence	
<u>Chapter 10</u>	<u>292</u>
Conclusions	
<u>Bibliography</u>	<u>312</u>
<u>Annex I</u>	<u>355</u>
Interview Guide	
<u>Annex II</u>	<u>356</u>
Overview of Publications	
<u>Annex III</u>	<u>362</u>
Curriculum Vitae	
<u>Annex IV</u>	<u>370</u>
Summary
