Disclaimer/Complaints regulations
If you believe that digital publication of certain material infringes any of your rights or (privacy) interests, please let the Library know, stating your reasons. In case of a legitimate complaint, the Library will make the material inaccessible and/or remove it from the website. Please Ask the Library: http://uba.uva.nl/en/contact, or a letter to: Library of the University of Amsterdam, Secretariat, Singel 425, 1012 WP Amsterdam, The Netherlands. You will be contacted as soon as possible.
## Contents

4 Diffractive stacks of metamaterial lattices 65
  4.1 Introduction ........................................... 66
  4.2 Starting point: 2D lattice-sum theory .................. 67
  4.3 Complex base and stacks of 2D layers ................ 70
  4.4 Diffractive calculation ............................... 72
  4.5 Fourier microscopy setup ............................. 74
  4.6 Diffraction measurement .............................. 75
  4.7 Angle-resolved transmission and pseudochirality .... 77
  4.8 Stacked lattices ..................................... 82
  4.9 Conclusion ............................................ 82
  4.10 References ............................................ 85

5 Backaction on a lattice of scatterers in front of a reflective interface 89
  5.1 Introduction ........................................... 90
  5.2 Theory .................................................. 91
  5.3 Results ............................................... 93
  5.4 Experiment ............................................ 104
  5.5 Conclusion ............................................ 106
  5.6 References ............................................ 108

Summary ................................................. 109

Samenvatting ............................................. 113

Acknowledgments ........................................ 117
