Molecular simulations in electrochemistry

Electron and proton transfer reactions mediated by flavins in different molecular environments

Kılıç, M.

Publication date

2014

Document Version

Final published version

[Link to publication](#)

Citation for published version (APA):

Kılıç, M. (2014). *Molecular simulations in electrochemistry: Electron and proton transfer reactions mediated by flavins in different molecular environments*. [Thesis, fully internal, Universiteit van Amsterdam].

Disclaimer/Complaints regulations

If you believe that digital publication of certain material infringes any of your rights or (privacy) interests, please let the Library know, stating your reasons. In case of a legitimate complaint, the Library will make the material inaccessible and/or remove it from the website. Please Ask the Library: <https://uba.uva.nl/en/contact>, or a letter to: Library of the University of Amsterdam, Secretariat, Singel 425, 1012 WP Amsterdam, The Netherlands. You will be contacted as soon as possible.

Contents

1	Introduction	1
1-1	Electron transfer in chemistry	2
1-2	Proton transfer in chemistry	3
1-3	Flavins in chemistry	4
1-4	Molecular simulation	5
1-5	Model and methods	5
1-6	This thesis	6
2	Techniques	9
2-1	Marcus theory	10
2-2	Calculation of pK_a using molecular simulation	13
2-3	Statistical thermodynamics	15
2-4	Molecular dynamics	16
2-5	DFT-based molecular dynamics	17
	2-5.1 Density Functional Theory	19
	2-5.2 Born–Oppenheimer molecular dynamics	21
2-6	Hybrid quantum mechanics / molecular mechanics	22
3	First and second one-electron reduction of lumiflavin in water – a first principles molecular dynamics study	23
3-1	Introduction	24
3-2	Methods	25
	3-2.1 Computational setup	29
3-3	Results	30
	3-3.1 Lumiflavin in the gas phase	30
	3-3.2 Lumiflavin in water, the solvent structure	33
	3-3.3 Lumiflavin in water, redox properties	39
	3-3.4 Non–linearity, inner sphere fluctuations, temperature and finite size effects	41
3-4	Conclusions	44
3-5	Supporting information	46

4	A microscopic picture of the solvent reorganization during electron transfer to flavin in water	51
4-1	Introduction	52
4-2	Methods	53
4-2.1	Calculation of redox potential	53
4-2.2	Computational setup	55
4-3	Results	56
4-3.1	Reduction of lumiflavin in vacuum	56
4-3.2	Reduction of lumiflavin in water solvent	58
4-3.3	Inner sphere and solvent reorganization, solvation shell structure rearrangement	62
4-3.4	Solvent reorganization, electronic effects	63
4-3.5	Solvent reorganization, electrostatic potential and fluctuations	67
4-4	Conclusions	69
4-5	Appendix	74
5	Acidity constants of lumiflavin from first principles molecular dynamics simulations	75
5-1	Introduction	76
5-2	Methods	79
5-2.1	Calculation of pK_a from constrained dynamics	79
5-2.2	Computational details	81
5-3	Results and discussion	82
5-4	Conclusions	87
5-5	Supplementary information	89
5-5.1	Radial distribution functions	89
5-5.2	Free energy profiles using the addition H_3O^+ restraint	91
6	The reorganization free energies for electron transfer in proteins: Redox properties of flavin in BLUF and LOV Domains	93
6-1	Introduction	94
6-2	Methods	97
6-2.1	Computational setup	98
6-3	Results	99
6-3.1	Reduction of flavin in different environments	99
6-3.2	Characterization of protein and solvent coupling with flavin redox properties	103
6-4	Conclusions	118
	Summary	121
	Samenvatting	123

Bibliography	127
Publications	141
Acknowledgments	143
