Molecular simulations in electrochemistry

Electron and proton transfer reactions mediated by flavins in different molecular environments

Kılıç, M.

You will be contacted as soon as possible.
Contents

1 Introduction .................................................. 1
   1-1 Electron transfer in chemistry .......................... 2
   1-2 Proton transfer in chemistry .......................... 3
   1-3 Flavins in chemistry .................................... 4
   1-4 Molecular simulation .................................... 5
   1-5 Model and methods ...................................... 5
   1-6 This thesis ............................................. 6

2 Techniques .................................................... 9
   2-1 Marcus theory ........................................... 10
   2-2 Calculation of $pK_a$ using molecular simulation ....... 13
   2-3 Statistical thermodynamics ............................. 15
   2-4 Molecular dynamics ..................................... 16
   2-5 DFT–based molecular dynamics ........................ 17
      2-5.1 Density Functional Theory .......................... 19
      2-5.2 Born–Oppenheimer molecular dynamics .......... 21
   2-6 Hybrid quantum mechanics / molecular mechanics ...... 22

3 First and second one-electron reduction of lumiflavin in water – a first principles molecular dynamics study 23
   3-1 Introduction ............................................. 24
   3-2 Methods .................................................. 25
      3-2.1 Computational setup ................................ 29
   3-3 Results .................................................. 30
      3-3.1 Lumiflavin in the gas phase ......................... 30
      3-3.2 Lumiflavin in water, the solvent structure ...... 33
      3-3.3 Lumiflavin in water, redox properties .......... 39
      3-3.4 Non-linearity, inner sphere fluctuations, temperature and finite size effects 41
   3-4 Conclusions ............................................. 44
   3-5 Supporting information ................................. 46
