Curriculum Vitae

Curriculum Vitae

Jan Hendrik (Erik) Vermaire was born on October 6th 1973 in Vlissingen, the Netherlands. He finished secondary school at O.S.G. Huygenwaard in Heerhugowaard in 1993 and started to study dentistry at the Academic Centre for Dentistry Amsterdam (ACTA) in that same year. During these years his interest in dental research started by joining the department of Social Dentistry and Behavioural Sciences as a research assistant focussing on complaints against general dental practitioners. He graduated dental school in March 2000 and started a general dental practice shortly after.

In January 2003 he started a postgraduate education in Management of Dental Fear at the department of Social Dentistry and Behavioural Sciences of ACTA and the Special Dental Care clinic Amsterdam (SBT). This post-initial master course was completed in June 2006. As a part of this postgraduate program, he completed a clinical study on the effect of dental anxiety treatment on Quality of Life in patients with a pathological fear of dental treatment.

To be able to work half time on his PhD project at the department of Social Dentistry and Behavioural Sciences at ACTA, he handed over his general dental practice in January 2005 and continued working half time as a specially trained dentist treating extremely anxious, psychological and psychiatric compromised dental patients at the Centre for Special Care Dentistry of a general hospital in Alkmaar (Medisch Centrum Alkmaar), where he has been working from March 2002 up till now.

Since November 2012, he works halftime as a dental researcher at TNO (Life Style-Behavioural and Societal Sciences) in Leiden.

Erik lives together with his wife Puck van Meurs and their daughter Veerle (2004) and son Adne (2007) in Stompeteren, the Netherlands.
