Disclaimer/Complaints regulations

If you believe that digital publication of certain material infringes any of your rights or (privacy) interests, please let the Library know, stating your reasons. In case of a legitimate complaint, the Library will make the material inaccessible and/or remove it from the website. Please Ask the Library: <https://uba.uva.nl/en/contact>, or a letter to: Library of the University of Amsterdam, Secretariat, Singel 425, 1012 WP Amsterdam, The Netherlands. You will be contacted as soon as possible.

Table of contents

<u>Nederlandse samenvatting</u>	5
<u>I. Introduction and Summary</u>	15
<u>II. The evolution of wide, low-mass interacting binaries</u>	
1) Very high mass transfer rates in binaries containing low mass giants.....	25
2) A wide low-mass binary model for the origin of axially symmetric non-thermal radio sources.....	29
3) Neutron star spin-up in wide, low-mass X-ray binaries.....	31
<u>III. Evolutionary scenarios for observed interacting binaries</u>	
1) The minimum orbital period for ultra-compact binaries with Helium burning secondaries.....	39
2) An evolutionary scenario for the black-hole binary A0620-00.....	46
<u>IV. Bondi-Hoyle accretion flow</u>	
1) A numerical study of cylindrically symmetric accretion flow.....	63
2) On the accretion of angular momentum from an inhomogeneous medium	81
3) On the accretion of angular momentum from an inhomogeneous medium II : Isothermal flow.....	93
4) On the accretion of angular momentum from an inhomogeneous medium III : General case and observational consequences.....	101
<u>V. Notes on the theory of Common Envelope evolution</u>	119
<u>Dankwoord</u>	146
