# Contents

1 Introduction ................................. 1
   1.1 Financial regulation .................. 1
   1.2 Credit Derivatives .................... 2
      1.2.1 The CDS market ................. 2
      1.2.2 The CDO market ................. 4
   1.3 Credit Ratings ....................... 5
   1.4 Fair Value Accounting ............... 6

2 Derivative Pricing with Liquidity Risk: Theory and Evidence from the Credit Default Swap Market 9
   2.1 Introduction .......................... 9
   2.2 A model for pricing liquidity in asset and derivative markets ......... 13
      2.2.1 Motivation ........................ 13
      2.2.2 Assumptions and notation ....... 14
      2.2.3 Asset pricing implications: Benchmark model ................ 15
      2.2.4 Example .......................... 18
      2.2.5 Model extension I: Long-horizon investors ................ 19
      2.2.6 Model extension II: Idiosyncratic background risk and hedging demand .......................... 21
   2.3 Applying the theory to the CDS market .......................... 23
      2.3.1 Motivation and theoretical predictions ................ 23
      2.3.2 Estimation method ................ 24
   2.4 Data and construction of main variables .......................... 25
      2.4.1 Data description .................. 25
      2.4.2 Portfolio construction ............ 26
      2.4.3 CDS portfolio return and transaction costs ................ 27
      2.4.4 Non-traded credit risk factor and non-hedge asset ............ 29
      2.4.5 Time-series model of liquidity .................. 29
## CONTENTS

2.4.6 Expected CDS returns ............................................. 30  
2.4.7 Alternative CDS liquidity measures .................................. 31  
2.5 Empirical Results .......................................................... 32  
2.5.1 Betas, costs and expected returns ................................... 32  
2.5.2 Benchmark results ..................................................... 33  
2.5.3 Backing out structural parameters .................................. 35  
2.5.4 Robustness checks ..................................................... 36  
2.5.5 Bond liquidity and hedging pressure ................................ 38  
2.6 Conclusion ................................................................. 40  
2.7 Tables ................................................................. 41  
2.8 Figures ................................................................. 47  
2.9 Appendix ................................................................. 52  
2.9.1 Proof of Theorems I to III .......................................... 52  
2.9.2 Taylor approximations ............................................... 55  
2.9.3 GMM standard errors ................................................ 55  
2.9.4 Repeat sales method ................................................... 56  
2.9.5 Risk-free rates and default probabilities .............................. 57

3 Tiebreaker: Certification and Multiple Credit Ratings ................. 59  
3.1 Introduction .............................................................. 59  
3.2 Motivation .............................................................. 63  
3.2.1 Credit Rating Agencies and Regulation .............................. 63  
3.2.2 Why Multiple Ratings Matter ....................................... 65  
3.2.3 Related Research ..................................................... 68  
3.3 Sample Construction and Methodology .................................... 71  
3.3.1 Measures and controls ................................................. 71  
3.3.2 Data and filters ....................................................... 72  
3.4 Empirical results .......................................................... 75  
3.4.1 Rating Differences and Rating Information ......................... 75  
3.4.2 Likelihood for Having a Fitch Rating ................................. 78  
3.4.3 Price Effects of Certification ....................................... 81  
3.4.4 Financials ............................................................ 83  
3.5 The nature of certification ................................................ 84  
3.5.1 Information-sensitive versus Information-insensitive securities 84  
3.5.2 Empirical implications ................................................ 85  
3.6 Conclusion .............................................................. 88  
3.7 Figures .............................................................. 91
3.8 Tables

4 Return decompositions: Evidence from the corporate bond market

4.1 Introduction

4.2 Literature review and contribution

4.3 Cash flow and discount rate news in corporate bonds

4.3.1 Campbell-Shiller approximation for corporate bonds

4.3.2 Unexpected return decomposition

4.3.3 Excess returns

4.4 Empirical approach

4.4.1 Discount rate news

4.4.2 Direct cash flow news

4.5 Data

4.6 Results

4.6.1 VAR results

4.6.2 Direct cash flow news

4.6.3 Accounting for persistent variables

4.6.4 The case with a 1 month treasury

4.6.5 Alternative variance decomposition

4.7 Conclusion

4.8 Tables

4.9 Appendix

4.9.1 Derivation of continuous compounded par coupon duration

5 Conclusion

5.1 Summary of the main findings

5.2 Implications of the findings

5.3 Suggestions for future research

6 Samenvatting (Summary in Dutch)
