You will be contacted as soon as possible.
List of Tables

Table 2.1: $T_{\text{max}}$ for different preferences and different relative prizes ........................................ 16
Table 2.2: Summary statistics of the lottery questions ........................................................................... 20
Table 2.3: Estimated preference parameters .......................................................................................... 25
Table 2.4: Maximum-likelihood estimates ............................................................................................. 30
Table 3.1: The Obtained Indifferences in Part I .................................................................................... 48
Table 3.2: Sample Selection Probit and Classification .......................................................................... 51
Table 3.3: Weighted Mean Results Utility Curvature .......................................................................... 53
Table 3.4: Classification of Respondents ............................................................................................. 54
Table 3.5: Estimated mean utility curvature ......................................................................................... 56
Table 3.6: Regression Results .............................................................................................................. 58
Table 3.7: Mean Results Loss Aversion ................................................................................................. 59
Table 3.8: Sample Mean Results Utility Curvature ............................................................................. 64
Table 4.1: Empirical estimates of prospect theory using different parametric functionals ............... 76
Table 4.2: The Obtained Indifferences in Part II ................................................................................... 79
Table 4.3: Summary Statistics (unweighted) ......................................................................................... 80
Table 4.4: Estimation Strategy ............................................................................................................ 84
Table 4.5: Maximum likelihood estimates ............................................................................................. 86
Table 4.6: Estimated Variance-Correlation Matrices of outcome sequences ..................................... 92
Table 4.7: Sample Selection Equations ................................................................................................. 95
Table 5.1: Descriptive Statistics .......................................................................................................... 109
Table 5.2: Student characteristics, loan experience and loan knowledge (OLS) ................................. 110
Table 5.3: Mean responses to questions about loan conditions, by treatment status ....................... 111
Table 5.4: Effect of information on knowledge, all and by loan experience ....................................... 114
Table 5.5: The effects of treatment and knowledge on borrowing behavior - OLS, Reduced Form (RF) and IV ......................................................................................................................... 115
Table 5.6: OLS, Reduced Form (RF) and IV including regressors.............................................117
