Advances in endoscopic resection and radiofrequency ablation of early esophageal neoplasia
van Vilsteren, F.G.I.

Citation for published version (APA):
van Vilsteren, F. G. I. (2013). Advances in endoscopic resection and radiofrequency ablation of early esophageal neoplasia
# CONTENTS

Introduction and outline 7

**PART ONE: ENDOSCOPIC RESECTION**

**Chapter 1** Learning endoscopic resection of esophageal neoplasia is associated with significant complications even in a structured training program. *Endoscopy*. 2012 Jan;44(1):4-12.

**Chapter 2** Do’s and don’t of endoscopic resection: lessons learned from a structured training program.

**PART TWO: RADIOFREQUENCY ABLATION**

**Chapter 5** Stepwise radical endoscopic resection versus radiofrequency ablation for Barrett’s esophagus with high-grade dysplasia or early cancer: a multicentre randomized trial. *Gut*. 2011 Jun;60(6):765-73.

**Chapter 6** Endoscopic radiofrequency ablation combined with endoscopic resection for early neoplasia in Barrett’s esophagus longer than 10 cm. *Gastrointest Endosc*. 2011 Apr;73(4):682-90.

**Chapter 8** Simplifying radiofrequency ablation of Barrett’s esophagus containing dysplasia: a randomized multicenter trial comparing three treatment regimens for circumferential ablation. *Clin Gastroenterol Hepatol*. Accepted, Dec 2012.

**Chapter 9** A simplified regimen for focal radiofrequency ablation of Barrett’s mucosa using the HALO[^90] system: a randomized multicenter trial comparing the two ablation regimens. *Gastrointest Endosc*. Accepted, Feb 2013.
Chapter 10  A prospective multicenter study to identify predictive markers for initial treatment response after circumferential radiofrequency ablation for Barrett’s esophagus with early neoplasia. Endoscopy. Accepted, Jan 2013.

PART THREE: SINGLE SESSION RFA AND ER

Chapter 11  Safety of simultaneous use of endoscopic resection and radiofrequency ablation in an esophageal porcine model. Submitted.
