You will be contacted as soon as possible.

Contents

Introduction and Summary

Chapter I: Evolutionary calculations for low-mass single stars and low-mass close binary systems with a compact component.

I.1. The evolution of low-mass single stars.

a) Structural evolution

b) **Magnetic Structure in Cool Stars: XV. The evolution of rotation rates and chromospheric activity of giants.**

R.G.M. Rutten and E.H.P. Pylyser: 1988, *Astron. Astroph.*,
191, 227

I.2. The evolution of low-mass close binary systems with a compact component

a) **An evolutionary scenario for the black hole candidate A0620-00**

M. de Kool, E.P.J. van den Heuvel, E.H.P. Pylyser: 1987,
Astron. Astroph., 183, 47

b) **Evolution of low-mass close binary systems with a compact component**

E.H.P. Pylyser and G.J. Savonije: 1988, *Astron. Astroph.*,
191, 57

c) **Evolution of low-mass close binary systems with a compact component: II. Systems captured by angular momentum losses.**

E.H.P. Pylyser and G.J. Savonije: 1988, *Astron. Astroph.*,
accepted

Chapter II: Spin evolution of magnetized neutron stars in low-mass close binaries.

II.1. **Spin evolution of magnetized neutron stars in low-mass close binaries**

E.H.P. Pylyser: 1988, *Astron. Astroph.*, submitted

II.2. **On the birth rates of low-mass galactic binary radio pulsars and their possible progenitor-systems.**

J. Cote and E.H.P. Pylyser: 1988, *Astron. Astroph.*, submitted
