You will be contacted as soon as possible.

Contents

Preface	1
1 Top quarks and the Standard Model	3
1.1 The Standard Model	3
1.1.1 Quantum electrodynamics	4
1.1.2 Weak interactions	7
1.1.3 Strong interactions	9
1.1.4 The history of the top quark	10
1.1.5 Predictive power of the Standard Model	12
1.1.6 Unresolved issues in the Standard Model	12
1.2 Physics at the Large Hadron Collider	14
1.3 Top quarks in the Standard Model	15
1.3.1 Production	16
1.3.2 Top quark mass and Higgs	22
1.3.3 Decay	23
1.4 Top quarks in models beyond the Standard Model	26
1.4.1 Resonances	26
1.4.2 Top quark charge asymmetry	27
1.5 Summary	33
2 Properties and performance of the ATLAS detector	35
2.1 The Large Hadron Collider	35
2.2 The ATLAS detector	38
2.2.1 Coordinates in ATLAS	39
2.2.2 Magnet system	40
2.2.3 The inner detector	40
2.2.4 Calorimetry	45
2.2.5 The muon spectrometer	48
2.2.6 The ATLAS trigger system	52
2.3 Summary	54
3 Simulation and reconstruction of top quark pair events	57
3.1 Event generation	58
3.1.1 Hard scattering	58
3.1.2 Parton showering	59

Contents

3.1.3	Hadronization	61
3.1.4	Underlying event	61
3.2	Detector simulation and response	62
3.3	Event samples for analysis	62
3.3.1	Signal samples: top quark pairs	62
3.3.2	Background samples	63
3.4	Object reconstruction	65
3.4.1	Electron reconstruction	66
3.4.2	Muon reconstruction	67
3.4.3	\cancel{E}_T reconstruction	69
3.4.4	Hadronic jet reconstruction	70
3.5	Initial and final state radiation in top quark events	74
3.5.1	Parameters	75
3.5.2	Effect of Λ_{QCD} and Q_0 on jet multiplicity	76
3.5.3	Effect of Λ_{QCD} and Q_0 on reconstructed top quark mass	77
3.5.4	Conclusions on ISR and FSR	80
4	Selection and characteristics of data	81
4.1	Introduction	81
4.1.1	Pile-up	83
4.1.2	Data quality	83
4.2	Object definitions for analyses	84
4.2.1	Electrons	85
4.2.2	Jets	85
4.2.3	Muons	85
4.2.4	Corrections to leptons	86
4.3	Multijet background	86
4.3.1	Muon channel	87
4.3.2	Electron channel	87
4.4	W +jets background normalization	88
4.5	Basic event selection	89
4.5.1	Event yields	90
4.6	Distributions in data: 2010 versus 2011	91
4.6.1	Electron properties	91
4.6.2	Muon properties	93
4.6.3	Jet properties	93
4.6.4	Event variables	95
4.6.5	Identification of b -jets	98
4.6.6	W +jets background normalization after b -tagging	102
4.7	Top quark reconstruction	102
4.7.1	Reconstruction with $\sum p_T$ method	103
4.7.2	Reconstruction with Kinematic Likelihood Fitter	105
4.8	Comparison of the KL-fitter and $\sum p_T$ algorithms	109
4.9	Summary	111

5	Measurement of the $t\bar{t}$-production cross section	113
5.1	The simultaneous template fit	114
5.1.1	The construction of the fit	114
5.2	Properties of data	117
5.2.1	Data categorization	117
5.3	Extraction of ratios	119
5.3.1	First fit ratio and heavy flavor uncertainty	119
5.3.2	Second fit ratio	124
5.3.3	Third fit ratio	125
5.4	Construction of the templates	125
5.4.1	Background templates	125
5.4.2	Signal templates	126
5.5	Fit results	127
5.5.1	Statistical uncertainty	128
5.6	Systematic uncertainties	130
5.7	Cross section results	135
6	Measurement of the top quark charge asymmetry	137
6.1	Top quark charge asymmetry at the parton level	137
6.1.1	Integrated asymmetry	138
6.1.2	Differential asymmetry	139
6.2	Properties of the data set	141
6.2.1	Event yield	141
6.2.2	Control plots on background-subtracted data	142
6.3	Standard Model asymmetries after selection	146
6.3.1	Asymmetry in $t\bar{t}$ simulation	147
6.3.2	Asymmetry in Standard Model background simulation	150
6.4	Results for A_{int}	152
6.4.1	Unfolding	153
6.4.2	Systematic uncertainties	156
6.4.3	Final results after unfolding A_{int}	157
6.4.4	Discussion on new physics expectations	158
6.5	Results for $A_{diff}(y)$	158
6.6	Summary	161
	References	163
	Summary	171
	Samenvatting	175
