Chapter 8: Prognostic relevance of PCI-related myocardial infarction
*Nature Reviews Cardiology. 2013 Apr;10(4):231-6*

PART B: Risk stratification in acute coronary syndromes

Chapter 9: Usefulness of the admission electrocardiogram to predict long-term outcomes after non-ST-elevation acute coronary syndrome (from the FRISC II, ICTUS, and RITA-3 [FIR] Trials)
*American Journal of Cardiology. 2012 Jan 1;109(1):6-12*

Chapter 10: Growth-differentiation factor 15 for long-term prognostication in patients with non-ST-elevation acute coronary syndrome: an invasive versus conservative treatment in unstable coronary syndromes (ICTUS) substudy
*International Journal of Cardiology 2013, revision*

Chapter 11: Multiple biomarkers at admission significantly improve the prediction of mortality in patients undergoing primary percutaneous coronary intervention for acute ST-segment elevation myocardial infarction.
*Journal of the American College of Cardiology. 2011 Jan 4;57(1):29-36*
*Erratum in: J Am Coll Cardiol. 2011 Apr 19;57(16):1717-9*

Chapter 12: Survival of patients after ST-elevation myocardial infarction: external validation of a predictive biomarker model
*Clinical Chemistry. 2012 Jun;58(6):1063-4*

Chapter 13: Multiple biomarkers at admission are associated with angiographic, electrocardiographic and imaging cardiovascular mechanistic markers of outcomes in patients undergoing primary percutaneous coronary intervention for acute ST-elevation myocardial infarction.
*American Heart Journal. 2012 May;163(5):783-9*

Chapter 14: Summary of the thesis
*Samenvatting van het proefschrift*

Chapter 15: Authors and affiliations
*Dankwoord / Acknowledgements*
*Curriculum Vitae*
