INDEX

(1) General introduction and thesis outline

PART 1 - Genetic Diagnosis of FH

(2) Molecular basis of FH, assessed in a large pediatric cohort

(3) Identification of novel *APOB* mutations explaining FH phenotype

(4) Quality assessment of genetic FH diagnosis
   Submitted 2012.

(5) Method to identify non pathogenic variants in *LDLR* and *APOB*
   *Human Mutation* 2010;31(6):752-760.

(6) Cardiovascular risk and functionality criteria for the *LDLR*
   *European Heart Journal* 2012;33(18):2325-2330.

(7) Prevalent FH mutations in the Netherlands

PART 2 - Variable Phenotype of FH

(8) Discriminative ability of LDLc to discern FH patients from
    unaffected relatives

(9) Carotid atherosclerosis in normocholesterolemic patients with
    an FH genotype

(10) PCSK9 plasma levels and variable FH phenotype
Loss of function \textit{APOB} and \textit{PCSK9} mutations in FH patients without phenotype \\
\textit{Human Mutation} 2012;33(2):448-455.

Case series: two patients with both heterozygous FH and CTX \\

The link between the LDL receptor function and coagulation factor VIII \\
\textit{Blood} 2011;118(26):6990-6991.

\textbf{PART 3 - Access to Life Insurance after Genetic FH diagnosis}

Review on access to insurance in FH patients \\

Improved access to life insurance after genetic FH diagnosis \\

\textbf{PART 4: Treatment of FH}

Review on treatment of familial hypercholesterolemia \\

Survey on medication use after genetic FH diagnosis \\

Effectiveness of FH screening in prevention of coronary artery disease \\
\textit{Submitted} 2012.

Achievement of LDLc target levels in outpatient clinics \\
\textit{Atherosclerosis} 2010;209(1):189-194.

\textbf{RCT: Colesevelam added to statin and ezetimibe in FH} \\
(21) PCSK9 plasma levels and clinical outcomes in the TNT trial  
*Journal of American College of Cardiology* 2012;59(20):1778-1784.

(22) Summary, general discussion and conclusion  353
