Breast lesion detection using diffuse optical imaging
Leproux, A.

Citation for published version (APA):
Leproux, A. (2012). Breast lesion detection using diffuse optical imaging
# Table of Contents

1 Introduction

1.1 Breast cancer statistics
1.2 Breast anatomy
1.3 Breast cancer types
1.4 Current breast imaging techniques
1.5 Optical imaging
1.5.1 Light propagation in biological tissue
1.5.2 Diffuse optical techniques
1.5.3 Spectroscopy
1.5.4 Fluorescence imaging
1.6 Thesis goals and outline

2 Instrumentation and clinical applications

2.1 Philips diffuse optical tomography systems for breast imaging
2.1.1 The Mammoscope
2.1.2 The fDOT system
2.2 Laser breast scanner
2.3 Conclusion

3 Average attenuation of healthy and diseased breast tissue

3.1 Introduction
3.2 Materials and methods
3.2.1 Instrumentation – the Mammoscope
3.2.2 Theory – the attenuation coefficient
3.2.3 Human subjects
3.2.4 Statistical analysis
3.3 Results and discussion
3.3.1 Average attenuation of healthy tissue
3.3.2 Demographic and optical properties of healthy tissue
3.3.3 Average attenuation of cancerous breasts
3.4 Conclusion

4 Statistically combined absorption and fluorescence

4.1 Introduction
4.2 Materials and methods
4.2.1 Instrumentation
4.2.2 Fluorescent contrast agent: Omocianine
4.2.3 Phantom measurements
4.2.4 Patients
4.2.5 Data classification
## 5 Combining optical and fluorescence imaging in scatterplots

- **Introduction**
- **Materials and methods**
  - **Instrument**
  - **Fluorescent contrast agent**
  - **Phantom**
  - **Patients**
  - **Determination of total hemoglobin concentration**
  - **Scatterplots**
- **Results**
  - **Materials and methods**
  - **Patients measurements**
- **Discussion**
  - **Phantom measurements**
  - **Patients measurements**
  - **Targeted fluorescent contrast agent and scatterplots**
  - **Conclusion**

## 6 Reference tissue for self-referencing differential spectroscopic lesion detection

- **Introduction**
- **Materials and methods**
  - **Instrument**
  - **Spectral analysis**
  - **Patients and measurement procedure**
  - **Data analysis**
  - **Statistical analysis**
- **Results**
  - **Impact of amount of reference points**
  - **Impact of referencing on the ipsilateral side**
  - **Impact of referencing with areola tissue**
- **Discussion and conclusion**

## 7 Conclusion

**Summary**

**Samenvatting**
