Acknowledgements

The following names are among the people I am truly grateful and without them I would not be able to complete this thesis book.

Ajarn Praphan, my 'Boss' at work, my 'Papa' at home, and overall my 'Role Model' in living my life fruitfully for this world. I have learned throughout every moment I have had with you, even when I argued with you or thought you did not support me! Mama, you are always there to support me and Papa. Both of you are the ones who have made me 'Nittaya' today.

Pi Jin, you ARE the reason I have this thesis! Amazingly, you have this ability to push people around you to perform at their maximum potential. You have been and will always be a great boss and a lovely sister to me.

Prof. Dr. Joep Lange, dear Joep, I thank you very much for letting me be one of your PhD students. I am grateful to the trust and opportunity you gave to me. Prof. Dr. Joel Palefsky, dear Joel, I am deeply impressed by your enthusiasm to share your expertise with people around the world and advocate for the best of your patients. You are my great mentor with such a unique way of teaching.

Pi Nipat, I couldn't thank you enough for your hard work in the clinic and your patience with me! Your 'manly' leadership is the skill I wish to follow. Pi Muay, pi Mitr, Ball, Honey, Sai, Taew and the rest of the Special Task Force Team, I am thankful that we are such a great team of dedicated people. I love you all.

Dear Steve, I feel so privileged working with you! A highly skilled statistician with a great clinician's mind are who you are. Kor, thank you for your willingness to help me and Steve, regardless of 'when' you were asked. Thank both of you from the bottom of my heart.

Reshmie, you have impressed me with the Dutch way of simplicity. You are a young women who are so 'matured' mentally. Thank you so much for helping me out of many troubles, especially during the 'Berlin' trip! Pi Anchalee, your calmness of mind among your busy days in clinics and meetings has always been a great mental support to me. I am so fortunate to be a fellow PhD student with both of you.

Tip and Deaw, I have enjoyed a great deal working with you and the rest of the Thai Red Cross Anonymous Clinic Lab team! Thank you so much for your patience working with a clinician like me in the past few years. I believe the mutual respect and trust we have developed will be sustained for years to come.

Dear Fon and Tal, without the professionalism in you we would not have these so many works carried out with the resources we have! Thank you very much.
Pi Lek, pi Pao, Fai, June, and the Thai Red Cross Anonymous Clinic team, you are the heroes in the field. I am so proud of you and the work that you have been doing for decades. It is my great honour to work with you!

Dear Annette, I could still feel the 'thrill' I had on the evening that you called to let me know about the opportunity to carry out the HPV and AIN work in Bangkok. You are such a great supporter to the works in our region. Your charm, leadership, kindness and friendship always impress me!

Toey, Te, Toh, Tunt, it has not been easy for me to acheive the 'balanced' quality (one of the IB learner profile!) but you all have helped me out. Although it is quite hard to tell what kind of supports you have given to me but we have been successful to keep our daily family life going on happily most of the time throughout these years. I love you all so much.
