Acknowledgments
Somebody once told me “there is something magic in getting your PhD, it is something to be proud of and that nobody can take it away from you!” Dear Maria, did you recognize your words? Once more, you were right. I had to get to the last page of this thesis to realize it myself. Simply, thank you. I came into your group as a student more than five years ago but your contagious enthusiasm for coronary physiology convinced me to stay for playing a bigger game. If you had not convinced me, I would not be here today. Thank you for having transformed the young student into a young scientist. Sometimes people absorb knowledge without even realizing. It is difficult to quantify how much I learned during these years and probably you wanted to teach me much more but thanks to you, I will always keep a critical view not only in analyzing data but also in many more aspects of my life.

Dear Jos, I have been privileged having you as my promoter. Thank you for having been present during these years as a scientific guide for a young scientist but also for those precious advices you gave me at the border between professional and personal. Your friendly smile even during deep scientific discussions and our shared passion for white chocolate made our time working together always efficient and pleasant.

Dear Jan, being a promoter in a different department limited our interactions but your office’s door was always open and I thank you for that. Especially thank you for the respect you always showed for my scientific thoughts. That certainly helped me in believing in my capabilities and to be one step closer to the self-confidence.

Thank you to Divaka and all the staff at the Cardiology department at St Thomas Hospital at KCL for welcoming me with a smile in their cath-lab and for fighting together to get nice data. Especially thank you to Kalpa and Kal for the friendly time spent together in London and to Tim for his always helpful and friendly mood. It has been a pleasure working with you guys!

Thank you to all my colleagues at the BMEP. Especially thank you to Martin for the support with the programs needed for my analysis: your help has been essential! Being part of a nice and supporting team always makes things easier and Martin, Janina, Froukje, Monique and Jeroen are the proof of that! As a team, we played together to improve each others work but also to support each other when the game became too heavy. Thank you also to Jetty for having always been keen to help this Italian girl sometimes lost in the Netherlands with so many bureaucratic matters.

Thank you also to all the colleagues at the Cardiology department. Especially thank you to Tim and Esther for the nice collaborations and their friendly mood.

Living in a foreign country is not always easy but a lot of friends contributed to make these years spent in the Netherlands very “gezellig”.
Nazanin, you are certainly the one on the top of this list. There are no sufficient words to describe how much your presence meant to me. You have been the best friend I could have had during these years with the peace and the freedom of being with you like in front of a mirror. We experienced together all the personal and professional ups and downs and even when everything around seemed dark... “at least we had each other!”.

Big thanks also to my other paraninf, Pepijn. The thanking list is endless. I could start with the many Dutch-English translations during these years (and one key English-Dutch translation: the “samenvatting” of this thesis!) or with the crucial rescues of this clumsy driver or with being such a helpful paraninf. But the practical support has only been the complement to so many nice chats and friendly times. Thanks for being a friend that I could count on.

Alessandra, ma quanto mi mancheranno le nostre piccole pause e momenti gossip... Sei stata un’amica importante in questi anni e il tuo carattere gioioso e socievole ti rende una persona solare che fa piacere avere intorno. Grazie per il buon umore che mi hai sempre trasmesso.

Felipe tu as été mon premier ami aux Pays Bas et un support important pendant ces années. Merci pour avoir écouté mes plaintes et m’avoir fait rire quand j’en avais besoin. L’AMC était un endroit sans doute plus triste sans toi.

A volte capita di conoscere qualcuno e avere l’impressione di essere amiche da sempre. Lorena, per me appartieni sicuramente a questa categoria rara di persone. Grazie per la tua amicizia spontanea in questi ultimi mesi: sicuramente è solo l’inizio!

Thank you to Babu, Goran, Iker, and Maria to have filled these years with a lot of laughter. You have been the best outcome of the Dutch course: I did not learn Dutch but I found good friends.

A big thanks to all the “den Haag creek” in particular to Tatiana & Andres and Maud & Alex to have been present during these years as a sort of a local family. Un grand merci surtout a Maud pour son amitié spontanée et les bons moments de relax: il y en aura sans doute plein d’autres!

Thanks to all my “historical friends” in Italy and in Switzerland for still being present in my life despite the distance and the too irregular contacts.

“Lontano dagli occhi ma sempre vicino al cuore”...my family. As typical Italian, family is everything. It does not matter how geographically far you are, how busy your life is, or how many times your phone rings. They are just there. Always. If I would name separately all the ones who have always been close to me with their unconditional support and practical or life advices, I would end up with the Acknowledgment chapter being the longest of this thesis. I would just name the closest hoping that the others who deserve acknowledgments (especially Ariella,
Ignacio y Roser and zia Licia) would recognize themselves in this introduction and they would not mind too much!

Grazie ai miei nonni Carlo e Laura per essere sempre stati la costante e l'equilibrio nella mia vita. Se un giorno riuscirò a essere per i miei nipoti solo la metà di quello che voi siete per me e per il resto della famiglia, avrò allora raggiunto con successo il traguardo più importante della vita.

Grazie ai miei fratelli Carlo, Victoria e Alberto per essere sempre stati uniti nei momenti belli e quelli meno, per esserci comunque incondizionatamente e per regalarmi sempre un sorriso sulla faccia, anche quando non lo fanno apposta… Grazie anche alla piccola Sofia. Sei arrivata al mondo portando un sacco di gioia e amore a tutti noi. La zia ti vuole tanto bene.

Un grazie particolare a mio padre senza il quale, sicuramente non sarei arrivata fin qui. Gran parte di come sono oggi, con pregi e difetti, è per merito tuo. Papà, tra tutto ciò’ che sei per me c’è’ sicuramente il mio primo esempio scientifico e chi mi ha trasmesso la curiosità per la scienza. Ma soprattutto, mi hai insegnato a non accontentarmi e a lottare sempre per raggiungere traguardi importanti anche quando è difficile. Se non lo avessi capito, non sarei arrivata qua. Spero tu sia fiero di me.

Grazie alla mia mamma che, con la sua semplice spontaneità, mi ha sempre trasmesso la tranquillità che, comunque vada, va bene lo stesso: ai suoi occhi sono comunque la più’ brava! Grazie mami perché… la mamma è sempre la mamma!

Infine, un grazie speciale a mio marito che mi “supporta” e “sopporta” tutti i giorni anche quando non è facile! Alex, grazie per il tuo buon umore e gioia di vivere che mi trasmetti ogni giorno e che, principalmente negli ultimi mesi, bilanciano la mia irascibilità e sbalzi di umore. Ma soprattutto, grazie per essere, in una vita da nomade, il mio punto fermo, la mia certezza, la mia casa.

-Cristina
