Disclaimer/Complaints regulations

If you believe that digital publication of certain material infringes any of your rights or (privacy) interests, please let the Library know, stating your reasons. In case of a legitimate complaint, the Library will make the material inaccessible and/or remove it from the website. Please Ask the Library: <https://uba.uva.nl/en/contact>, or a letter to: Library of the University of Amsterdam, Secretariat, Singel 425, 1012 WP Amsterdam, The Netherlands. You will be contacted as soon as possible.

Contents

1	Introduction	1
1.1	Background and Motivation	1
1.1.1	HIV Epidemic	3
1.1.2	HIV Dynamics	4
1.2	Modeling HIV Dynamics	5
1.2.1	Phylogenetic Analysis	6
1.2.2	Agent-based Models	7
1.2.3	Complex Network Models	7
1.3	Thesis Overview	9
2	Modeling HIV-1 Intracellular Replication	11
2.1	Introduction	12
2.2	Modeling HIV-1 intracellular replication	13
2.2.1	Cell infection	14
2.2.2	Cell states and transitions	16
2.3	Model Implementation: Two different approaches	17
2.3.1	Stochastic Rate-Based Approach	17
2.3.2	Stochastic diffusion-based Approach	22
2.4	Simulation Results	26
2.5	Conclusions	29

3	Combining Epidemiological and Genetic Networks Signifies the Importance of Early Treatment in HIV-1 Transmission	33
3.1	Introduction	34
3.2	Results	36
3.2.1	Characteristics of the study population	36
3.2.2	Filter-reduction method and network construction	37
3.2.3	Analyzing characteristics of the contact network	38
3.2.4	Constructing the hypothetical transmission networks	47
3.2.5	Transmission network and phylogenetic clusters	53
3.2.6	Factors associated with super-spreaders	53
3.2.7	Comparison with random networks	56
3.3	Discussion	57
3.4	Materials and Methods	59
3.4.1	The Data	60
3.4.2	Phylogenetic analysis	61
3.4.3	Filtering process in the filter-reduction method .	63
3.4.4	Network visualization	64
3.A	Appendix Chapter 3	65
3.A.1	Tables	65
3.A.2	Figures	67
4	Combining Social and Genetic Networks to Study HIV transmission in Mixed Risk Groups	73
4.1	Introduction	74
4.2	Combining Social and Genetic Networks	75
4.2.1	Filter-Reduction Method	76
4.2.2	Overlaying Networks	80
4.3	Transmission Between Risk Groups	82
4.4	Conclusions and Future Directions	86
5	Complex Agent Networks: An Emerging approach for Modeling Complex Systems	89
5.1	Introduction	90
5.2	Formal definition of CANs	94
5.2.1	The agent node model	95
5.2.2	Networks of agent interactions	98

5.3	Applying CANs to modeling infectious diseases	101
5.3.1	Modeling host agent nodes	102
5.3.2	Measurements of the spreading of infectious dis- eases	104
5.4	Other Examples of CANs	108
5.4.1	Ecological examples	108
5.4.2	Economical and social examples	109
5.5	Research Issues	110
6	Summary and Conclusions	113
	Samenvatting	117
	Acknowledgments	141
	Bibliography	143
