You will be contacted as soon as possible.

Acknowledgments

First of all, I would like to express my sincere thank to my supervisor and promoter, Prof. Peter Sloot. His deep knowledge, guidance, support and patience always helped me throughout my PhD journey. The meetings and discussions we had have always inspired me and even his emails were always motivating me. Besides research, I have learned many other positive aspects of life from him.

I would like to thank people who I collaborated with to carry out this research: Emiliano Mancini, Mattia Prospero and Shan Mei.

I especially would like to thank the committee members for their time and patience.

Thank to my paranymphs, Narges Javaheri and Sareh Nakhaee for being good friends and for helping me throughout my defense.

I also thank Rick Quax for translating the summary of this thesis in Dutch.

I am grateful to all the colleagues in Computational Science research group at university of Amsterdam for creating a great atmosphere. And a special thanks to Erik Hitipeuw for his helps.

I would also like to thank all my Iranian friends in Amsterdam to make it feel like home, especially to Toktam and Sara.

This note would have not been complete without acknowledging my father, Asghar and my mother, Zahra. They have always supported

me in my life and offered me unconditional love. My mother, she has always been a source of inspiration in my life. A big thanks to my sister, Hajar, for being my best friend and to my brothers, Hamed and Majid, for their countless supports and to my little nieces, Fatemeh and Hoorah, for making my life colorful and more exciting. Thanks to my in-laws, Asghar, Fatemeh, Shokouh, Shiva, Shayesteh and Zahradokht for their warmth and love.

And finally thanks to my man, Shayan, for loving me and being with me all along.
