# Content

## Chapter 1

**General Introduction** 7
- Experimental design 11
- Sample preparation 12
- Chromatographic analysis 13
- Data pre-processing 14
- Data analysis 16
- Biological interpretation 18
- Final remarks 18

*References* 19

## Chapter 2

**An automated method for the analysis of phenolic acids in plasma based on ion-pairing micro-extraction coupled on-line to gas chromatography / mass spectrometry with in-liner derivatisation** 21

- 2.1. Introduction 23
- 2.2. Experimental 25
- 2.3. Results and discussion 27
- 2.4. Conclusions 40

*References* 41

## Chapter 3

**Parameter selection for peak alignment in chromatographic sample profiling: Objective quality indicators and use of control samples** 43

- 3.1. Introduction 45
- 3.2. Theory 47
- 3.3. Instrumentation and Methods 50
- 3.4. Results and discussion 54
- 3.5. Conclusions 63

*References* 64
Chapter 4

Development of an algorithm for peak detection in comprehensive two-dimensional chromatography

4.1. Introduction 67
4.2. Theory 69
4.3. Experimental 84
4.4. Results and discussion 85
4.5. Conclusions 91

References 93

Chapter 5

A new method for the automated selection of the number of components for deconvolving overlapping chromatographic peaks

5.1. Introduction 97
5.2. Theory 99
5.3. Experimental 103
5.4. Results and discussion 105
5.5. Conclusions 111

References 111

Chapter 6

Trend analysis of time-series data: a novel method for untargeted metabolite discovery

6.1. Introduction 115
6.2. Experimental 117
6.3. Results and discussion 123
6.4. Conclusions 133

References 134
Chapter 7 137
Untargeted metabolite discovery in kinetic data from multi-dose intervention studies
7.1. Introduction 139
7.2. Experimental 141
7.3. Results and discussion 147
7.4. Conclusions 158
References 158

Chapter 8 161
Development of a resolution metric in comprehensive two-dimensional chromatography
8.1. Introduction 163
8.2. Theory 166
8.3. Experimental 177
8.4. Results and discussion 179
8.5. Conclusions 185
References 186

Summary 189

Samenvatting 193
