You will be contacted as soon as possible.

GENERAL ACKNOWLEDGEMENTS

The Amsterdam Acute Aneurysm Trial was registered in the International Standard Randomized Controlled Trial Number Register as ISRCTN 66212637. The study was conducted according to the declaratio of Helsinki and approval was given by the Institutional Review Board in all participating centers. Partial funding was provided by the Dutch Heart Foundation (project: 2002B197), and the AMC Foundation. Neither of these bodies assisted in the interpretation of the data or the writing in any of the manuscripts. There are no conflicts of interest for any of the authors. The 3mensio software (3mensio Vascular, Bilthoven, The Netherlands) used for the study described in chapter 6 has been provided without costs for evaluation purposes.

The authors would like to thank all Amsterdam Acute Aneurysm trial collaborators for providing data, participation and critical appraisal of the manuscripts. The authors would like to thank H. Vriends, clinical librarian for constructing the search protocol for chapter 2 and J.L. Macneil-Vroomen and N van Geloven, for statistical assistance. The authors would also like to thank I. Westra for data collection for chapter 5 and F. Dick for providing data for Table 6 (appendix) of and critical appraisal of chapter 7.
