

Appendix Table S1: MammalDIET metadata.

Variable name	Variable definition	Units	Storage type	Variable codes and definitions	Missing value codes
TaxonID	Unique numeric code for each species, starting with 1 and ending with 5364.	Not available	Integer	Not available	
Order	The mammal order name of each species, following the IUCN taxonomy (IUCN 2013).	Not available	Character	Not available	
Family	The mammal family name of each species, following the IUCN taxonomy (IUCN 2013).	Not available	Character	Not available	
Genus	The mammal genus name of each species, following the IUCN taxonomy (IUCN 2013).	Not available	Character	Not available	
Species	The mammal species name, following the IUCN taxonomy (IUCN 2013).	Not available	Character	Not available	
Animal	Whether a mammal species eats animals (rank 1–3) or not (rank 0).	Not available	Integer	0 = does not eat animals; 1 = animals as primary food item; 2 = animals as secondary food item; 3 = animals as occasional food item.	NA
Vertebrate	Whether a mammal species eats vertebrates (1-3) or not (0).	Not available	Integer	0 = does not eat vertebrates; 1 = vertebrates as primary food item; 2 = vertebrates as secondary food item; 3 = vertebrates as occasional food item.	NA
Mammal	Whether a mammal species eats other mammals (rank 1–3) or not (rank 0).	Not available	Integer	0 = does not eat mammals; 1 = mammals as primary food item; 2 = mammals as secondary food item; 3 = mammals as occasional food item.	NA
Bird	Whether a mammal species eats birds (rank 1–3) or not (rank 0).	Not available	Integer	0 = does not eat birds; 1 = birds as primary food item; 2 = birds as secondary food item; 3 = birds as occasional food item.	NA
Herptile	Whether a mammal species eats herptiles (amphibians or reptiles) (rank 1–3) or not (rank 0).	Not available	Integer	0 = does not eat herptiles; 1 = herptiles as primary food item; 2 = herptiles as secondary food item; 3 = herptiles as occasional food item.	NA
Fish	Whether a mammal species eats fish (rank 1–3) or not (rank 0).	Not available	Integer	0 = does not eat fish; 1 = fish as primary food item; 2 = fish as secondary food item; 3 = fish as occasional food item.	NA
Invertebrate	Whether a mammal species eats invertebrates (rank 1–3) or not (rank 0).	Not available	Integer	0 = does not eat invertebrates; 1 = invertebrates as primary food item; 2 = invertebrates as secondary food item; 3 = invertebrates as occasional food item.	NA
Plant	Whether a mammal species	Not	Integer	0 = does not eat plants; 1 =	NA

	eats plants (rank 1–3) or not (rank 0).	available		plants as primary food item; 2 = plants as secondary food item; 3 = plants as occasional food item.	
Seed	Whether a mammal species eats seeds (rank 1–3) or not (rank 0).	Not available	Integer	0 = does not eat seeds; 1 = seeds as primary food item; 2 = seeds as secondary food item; 3 = seeds as occasional food item.	NA
Fruit	Whether a mammal species eats fleshy fruits (rank 1–3) or not (rank 0).	Not available	Integer	0 = does not eat fleshy fruits; 1 = fleshy fruits as primary food item; 2 = fleshy fruits as secondary food item; 3 = fleshy fruits as occasional food item.	NA
Nectar	Whether a mammal species eats nectar (rank 1–3) or not (rank 0).	Not available	Integer	0 = does not eat nectar; 1 = nectar as primary food item; 2 = nectar as secondary food item; 3 = nectar as occasional food item.	NA
Root	Whether a mammal species eats roots (rank 1–3) or not (rank 0).	Not available	Integer	0 = does not eat roots; 1 = roots as primary food item; 2 = roots as secondary food item; 3 = roots as occasional food item.	NA
Leaf	Whether a mammal species eats leaves (rank 1–3) or not (rank 0).	Not available	Integer	0 = does not eat leaves; 1 = leaves as primary food item; 2 = leaves as secondary food item; 3 = leaves as occasional food item.	NA
Woody	Whether a mammal species eats leaves of woody plants (rank 1–3) or not (rank 0). Allows the definition of browsers (as opposed to grazers).	Not available	Integer	0 = does not eat leaves of woody plants; 1 = leaves of woody plants as primary food item; 2 = leaves of woody plants as secondary food item; 3 = leaves of woody plants as occasional food item.	NA
Herbaceous	Whether a mammal species eats leaves of herbaceous plants (rank 1–3) or not (rank 0). Allows the definition of grazers (as opposed to browsers).	Not available	Integer	0 = does not eat leaves of herbaceous plants; 1 = leaves of herbaceous plants as primary food item; 2 = leaves of herbaceous plants as secondary food item; 3 = leaves of herbaceous plants as occasional food item.	NA
Other	Whether a mammal species eats other plant material (rank 1–3) or not (rank 0). Other plant material refers to plant food items that are not covered by the other plant categories (e.g., buds, flowers, pollen, and gum). It also includes fungi and lichens.	Not available	Integer	0 = does not eat other plant material; 1 = other plant material as primary food item; 2 = other plant material as secondary food item; 3 = other plant material as occasional food item.	NA
TaxonomicNote	Information on synonyms (species, genus, family), i.e., differences in taxonomy between Nowak (1999) and IUCN (2013).	Not available	Character	Not available	
FillCode	Data extrapolation method for species without species-level diet information in Nowak	Not available	Floating point	0 = species with species-level diet information in Nowak (1999); 1 = diet data were	NA

	(1999).			filled from available genus level information; 2.1 = diet data were filled from one species within the same genus where diet information was available; 2.2 = diet information was filled from other species within the same genus if all species had equal information, otherwise data were assigned as not available (NA); 3 = diet data were filled from available diet information at the family level.	
TrophicLevel	A classification of species into three trophic levels.	Not available	Character	Carnivore (predominantly eating animals); Herbivore (predominantly eating plant material); Omnivore (feeding on both animals and plants); NotAssigned (species which do not fit in any of the previous categories).	
MammalEater	Species with mammals as an important diet item	Not available	Integer	1 = species with rank 1 in diet category 'Mammal'; 0 = species without rank 1 in 'Mammal'	
Insectivore	Species with invertebrates as an important diet item	Not available	Integer	1 = species with rank 1 in diet category 'Invertebrate'; 0 = species without rank 1 in 'Invertebrate'	
Frugivore	Species with fruits as an important diet item	Not available	Integer	1 = species with rank 1 in diet category 'Fruit'; 0 = species without rank 1 in 'Fruit'	
Granivore	Species with seeds as an important diet item	Not available	Integer	1 = species with rank 1 in diet category 'Seed'; 0 = species without rank 1 in 'Seed'	
Folivore	Species with leaves as an important diet item	Not available	Integer	1 = species with rank 1 in diet category 'Leaf'; 0 = species without rank 1 in 'Leaf'	
DataSource	Whether data come from Nowak (1999), IUCN (2013), or whether they have been extrapolated.	Not available	Character	Nowak = data derived from Nowak (1999); IUCN = data derived from IUCN (2013); Extrapolated = data extrapolated from genus, other species within the same genus, or from family (see column 'FillCode')	

Appendix Table S2: Mammal orders and families and their summary information for extrapolating data on diet preferences from other species or other taxonomic levels (genus, family) to species for which species-level information was missing. Diet information was digitized from the literature and available for 2033 species at the species level (FillCode = 0). For the other species ($n = 3331$ species), diet data were first filled from the genus level (FillCode = 1, $n = 2556$ species), then from one other congeneric species (FillCode = 2.1, $n = 266$ species) or from >1 species within the same genus (FillCode = 2.2, $n = 71$ species), and finally from the family level (FillCode = 3, $n = 436$ species). See text for details and evaluation of extrapolation procedure.

Order	Family	Total species	Number of species (percentage) in FillCode
