INFLAMMATION IN
ISCHEMIA AND REPERFUSION

- FROM MICE TO MEN -
The work described in this thesis was performed at the Department of Experimental Surgery, Academic Medical Center and at the Department of Immunopathology, Sanquin Blood Supply Foundation, Amsterdam, The Netherlands.

The research was supported by Roba Metals B.V., IJsselstein, The Netherlands.

Printing of this thesis was financially supported by Chipsoft, Takeda Nederland B.V., W. L. Gore & Associates, Hycult Biotech, ERBE Nederland, ABN AMRO, Ipsen Farmaceutica B.V., Sanquin Blood Supply Foundation, Afdeling Heelkunde AMC, Nederlandse Vereniging voor Gastroenterologie.
# PART II: HUMAN MODELS OF TISSUE DAMAGE

## CHAPTER 7
Acute occlusive mesenteric ischemia: predictors of mortality after surgical treatment of bowel necrosis
Submitted

## CHAPTER 8
IgM antibodies against apoptotic cells and phosphorylcholine in patients with acute myocardial infarction in relation to infarct size and inflammatory response
*Advances in Clinical and Experimental Medicine 2012;21(4):455-67*

## CHAPTER 9
Influence of prophylactic probiotics and selective decontamination on bacterial translocation in patients undergoing pancreatic surgery. A randomized controlled trial

## CHAPTER 10
Discussion and future perspectives

## CHAPTER 11
Summary
Nederlandse samenvatting

## Appendices
- Publications
- PhD Portfolio
- Curriculum Vitae
- Dankwoord
