Contents

Chapter 1  General introduction and outline of this thesis  11

Part I  Diagnosing coagulopathy in the critically ill: thromboelastometry

Chapter 2  The utility of thromboelastometry (ROTEM) or thromboelastography (TEG) in non-bleeding ICU patients  29

Chapter 3  Utility of thromboelastography and/or thromboelastometry in adults with sepsis: a systematic review  41

Chapter 4  Thromboelastometry and multiple organ failure in trauma patients  65

Part II  Efficacy of plasma transfusion in critically ill patients

Chapter 5  Transfusion of fresh-frozen plasma in critically ill patients with a coagulopathy before invasive procedures: a randomized clinical trial  89

Chapter 6  Fresh frozen plasma transfusion fails to alter the hemostatic balance in critically ill patients with a coagulopathy  111

Chapter 7  Correlation of thromboelastometry with conventional hemostatic tests in critically ill patients with a coagulopathy treated with fresh frozen plasma  127

Chapter 8  Effect of transfusion of fresh frozen plasma on parameters of endothelial condition and inflammatory status in non-bleeding critically ill patients  143
## Contents

**Chapter 9**  Clinicians’ attitude towards prophylactic transfusion of fresh frozen plasma – an evaluation of a multicenter randomized clinical trial  157

**Part III**  Risks of transfusion in the critically ill: TRALI

**Chapter 10**  Risk factors for transfusion-related acute lung injury in ICU patients  171

**Chapter 11**  Contribution of damage-associated molecular patterns to transfusion-related acute lung injury in cardiac surgery  183

**Chapter 12**  Transfusion-related acute lung injury: a preventable syndrome?  201

**Chapter 13**  Prevention of immune-mediated transfusion-related acute lung injury; from bloodbank to patient  225

**Chapter 14**  Low risk TRALI donor strategies and the impact on the onset of transfusion-related acute lung injury; a meta-analysis  247

**Chapter 15**  Methylprednisolone fails to attenuate lung injury in a mouse model of transfusion-related acute lung injury  277

**Chapter 16**  The effect of C1-inhibitor in a murine model of transfusion-related acute lung injury  289

**Chapter 17**  Summary and general discussion  301

**Chapter 18**  Dutch summary  319
