On justifying eco-unfriendly behaviors

Meijers, M.H.C.

Citation for published version (APA):
The climate is changing, species are about to go extinct, and mountains of garbage are ever increasing. In order to preserve the earth and provide a good living standard for all its inhabitants, it is important for people to continue making environmentally friendly choices. This dissertation, however, shows that people do not always behave in a consistent manner when it comes to their environmentally friendly behaviors. It is investigated how individuals justify abstaining from environmental actions. Specifically, in Part I, it is shown that individuals' environmental behaviors are affected by their own previous behaviors. For example, engaging in environmentally friendly behavior may, ironically, lead individuals to subsequently justify being environmentally unfriendly. Second, in Part II, it is demonstrated that actions of other individuals' and external institutions may provide individuals with justifications for being environmentally unfriendly themselves. These findings have important implications when aiming to persuade people to behave in an environmentally friendly manner.

Faculteit der Maatschappij – en Gedragswetenschappen
Chapter 1: Dissertation Overview

Part I: Internal Justification

Chapter 2: Choosing to Donate Provides Justification
  Study 2.1: The dark side of donating

Chapter 3: Self-Identity and Justification
  Study 3.1: Environmental self-identity as a moderator
  Study 3.2: Replication of the moderation
  Study 3.3: Excluding an alternative explanation

Part II: External Justification

Chapter 4: Close Others Providing Justification
  Study 4.1: Close others’ environmental behavior providing justification
  Study 4.2: Close versus non-close others
  Study 4.3: Balancing the behaviors of close others

Chapter 5: Media Science Reports Providing Justification
  Study 5.1: Progress frame providing feelings of order
  Study 5.2: Order and environmentally unfriendly behavior
  Study 5.3: Environmental behavior providing feelings of personal control
  Study 5.4: Progress frames providing justification
