                 Prof. dr. H.L. Zaaijer
                 Dr. L. van der Linden

Faculteit der Geneeskunde
“Humans are limbs of one body
and are created with the same valuable essence.
When one limb passes its days in pain
the other limbs cannot remain at rest.
You, who feel no pain at the suffering of others
deserve not to be called human.”

Saadi Shirazi, Persian poet
Contents

Chapter 1 General introduction 11

PART I: Clinical relevance

Chapter 2 Rhinovirus C is not associated with wheezing or severe disease in an unselected birth cohort from the Netherlands 33

Chapter 3 Clinical relevance of positive human parechovirus type 1 and 3 PCR in stool samples 53

Chapter 4 Prolonged shedding of human parechovirus in feces of young children after symptomatic infection 69

Chapter 5 Exposure to recreational and drinking water and the occurrence of parechovirus and enterovirus infections in infants 79

PART II: Treatment options

Chapter 6 The need for treatment against human parechoviruses: how, why and when? 89

Chapter 7 Pleconaril revisited: clinical course of chronic enteroviral meningoencephalitis after treatment correlates with in vitro susceptibility 113

Chapter 8 Genetic and antigenic structural characterization for resistance of Echovirus 11 to pleconaril in an immunocompromised patient 127

Chapter 9 Successful IVIG treatment of human parechovirus-associated dilated cardiomyopathy in an infant 147

Chapter 10 Specific cell tropism and neutralization of human parechovirus types 1 and 3: implications for pathogenesis and therapy development 157

Chapter 11 Differences in maternal antibody protection against human parechovirus types 1, 3 and 4 in young infants 173
# PART III: Summary and Discussion
