You will be contacted as soon as possible.
6.1 Overview of the IJkDijk tests
6.2 Test site, instrumentation and loading sequence
6.3 Soil properties
6.4 Finite element analysis of levee stability and prediction of failure mode
6.5 Results of the FE simulation
6.6 Comparison of simulated data and sensor data
6.7 Sensor data analysis
6.8 Conclusions

Chapter 7 Artificial intelligence system training
7.1 Comparison of numerical approaches to dike failure prediction: data-driven analysis, model-based prediction, hybrid method
7.2 Virtual Dike Simulation Results
7.3 Detection of Artificially Generated Anomaly by the Artificial Intelligence Component
7.4 Conclusions

Chapter 8 Conclusions and directions for further research
8.1 Conclusions
8.2 Directions for further research

Chapter 9 Nederlandse Samenvatting

Chapter 10 Acknowledgements

Chapter 11 References
